About Industrial Bank

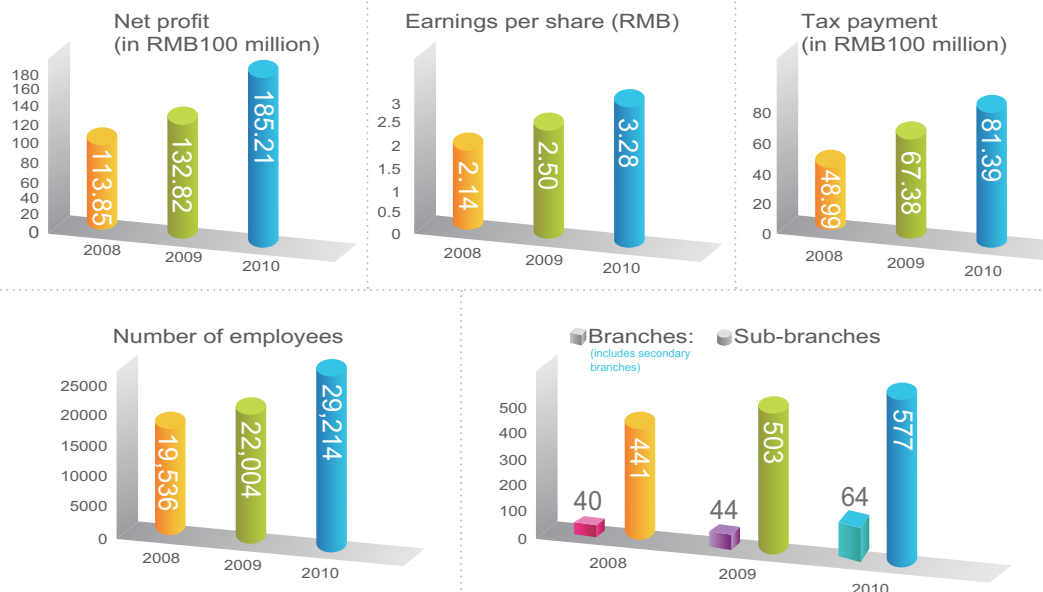

Founded in August 1988, headquartered in Fuzhou City, Fujian Province, Industrial Bank is among the first batch of joint-stock commercial banks approved by the State Council and the People's Bank of China. On February 5, 2007, Industrial Bank was listed on Shanghai Stock Exchange (Stock Code: 601166) with total registered capital amount **RMB5,992 million**.

For the past 23 years, the Bank has endeavored all the while to offer comprehensive, top-quality, and high-efficient financial service for clients on the base of managerial ideas that stress "Developing Together, Growing Together" and "Service Starts with Sincerity". As at December 31, 2010, the Bank's total assets reached **RMB1,849,673 million**, shareholders' equity amounted to **RMB91,995 million**, its NPL ratio was **0.42%**, and after-tax profit for the year was **RMB18,521 million**. According to the "Top 1,000 World Banks" list released by the British magazine The Banker in July 2010, the Bank ranked **93rd** in terms of total assets and **97th** in terms of Tier I capital. According to the ranking of the top 2,000 listed companies in the Forbes Global 2000 list for the year 2010, the Bank ranked **245th** in terms of comprehensive ranking, boasting a **14th** position among the **113** Chinese mainland enterprises that made it to the list.

The Bank follows the concept of scientific development and the State's macro-control policies, endeavors to improve its mechanisms of modern corporate governance, conscientiously fulfills its CSR, strives for innovation, accelerates its drive for strategic transformation internally, and seeks sustainable development from innovations in its business model, so as to lay a sound foundation for "Building a First-Class Bank, Creating Centuries of Prosperity".

Important Data

Three-year comparison

Contribution of Social and Economic Value

Total tax payment by the Bank in 2010 was **RMB8,139 million**, an increase of **13.43%** compared to the previous year, of which, corporate income tax increased by **2.09% YoY** to **RMB4,515 million**; business tax and surcharges increased by **33.14% YoY** to **RMB2.7 billion**; other taxes increased by **27.53%** to **RMB925 million**; total charitable donations amounted to **RMB64 million**; social contribution value per share was **RMB11.20**, up **17.40% YoY**, lending strong support to the country's economic development, as well as fulfilling its promise of good returns to its corporate shareholders and employees.

The Direct Levy Bureau of the Fujian Local Taxation Administration, the Fuzhou State Administration Bureau and the Fuzhou Local Taxation Administration jointly rated the Bank as a Class A tax-paying enterprise in 2008-2009.

Social contribution value per share in this report is in reference to the relevant requirements in the "Notice on Strengthening Social Responsibility in Listed Companies and Issuing Guidelines to Listed Companies in the Shanghai Stock Exchange on the Disclosure of Environmental Information" released by the Shanghai Stock Exchange on May 14, 2008, and the recommended calculation method for social contribution value per share that takes into account the characteristics of the banking industry, i.e. social contribution value per share = EPS + (tax payment + staff costs + interest expense + total public investment)/total equity at closing.

Overview

- ◎ Message from the Chairman
- ◎ Report from the President
- ◎ Sustainable Development and Corporate Governance

Chairman:
Gao Jianping

Message from the Chairman

The Bank made much progress in 2010, which marked a successful ending to our 2006-2010 development plans.

In the past five years, we endeavored to perfect our corporate governance, conscientiously fulfilled our social responsibilities and put forward a new concept in corporate governance, which is "proactively exploring multiple approaches to fulfill our social responsibility, and cultivate harmonious relationships among the human, nature, environment and society", thereby laying a solid foundation for our sustainable development. Guided by the concept of sustainable development, we incorporated social responsibility and sustainable development into our development strategy and implemented a differentiation strategy in our operations.

In the past five years, we have been looking at the big picture and setting long-term focus. We seize any opportunity that is beneficial and explore innovations. We are constantly seeking to improve ourselves and take pro-active measures. We work in unity and through cooperation to achieve win-win situations. We take great efforts to promote a value concept of sustainable development – firstly, the Bank has to be responsible by seeking stable returns for its shareholders and carefully manage their investments, so as to meet the shareholders' requirements in terms of their fundamental interests. Secondly, the objective of the Bank is to serve its customers and it needs to accurately understand the customers' needs and changes thereto and spare no efforts in helping them achieve value growth, thereby helping them attain sustainable development. Thirdly, the Bank needs to see growth in its employees as its own responsibilities and respect them and the contributions they make. It shall endeavour to enhance their sense of achievement and help them grow. Fourthly, the Bank needs to establish good competition and cooperation concepts with its peers in the industry and achieve win-win or even multi-win situations on the basis of competition and cooperation. Lastly, the Bank shall comply with laws and regulations and follow the strictest business ethics, be concerned about the social welfare, and promote social harmony.

In the past five years, we have put in great efforts to innovate our business model so as to achieve sustainable development in terms of the economy, environment and society. By integrating corporate governance, our risk control systems and products and services, we created a new business ecosystem and our unique characteristic of differentiation and our competitive advantage gradually took shape. These include the country's first low-carbon loan product, and the fact that we are the first bank in the country to adopt the Equator Principles and to set up a bank-to-bank platform. This gives us continuous momentum for seeking sustainable development.

We learn from many years of practice that it is impossible for a bank to exist and develop independently of the society. We can only grow for centuries to come and achieve our long-term goal of sustainable development by closely binding our interests with that of the society and work towards sustained development in the economy, environment and society.

We have great responsibilities to shoulder for the next five years to come. We shall fulfill our duties and obligations as a corporate citizen with even greater determination and repay to society for its support and trust with our actions.

Chairman

Director and President:
Li Renjie

Report from the President

2010 is the year with the most “complicated” macroeconomic situations since the beginning of this century. Guided by the concept of scientific development, the Bank undertook in-depth implementation of national macroeconomic policies and financial regulatory requirements and adhered to the strategy of the sustainable development. We followed our core ideas and values of social responsibility and sustainable finance and promoted the sustainability of faster and better development in all aspects of our work, thereby achieving a successful ending for our 2006-2010 development plans.

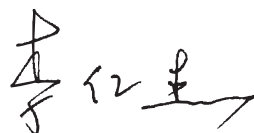

Exploring the sustainable development path of “differentiated management”: in the past five years, the Bank has been constantly exploring and seeking innovations in modes of financial services that support the sustainable development. We were the first in the country to launch energy efficiency financing in 2006 and we created the country's first inter-bank cooperation business service—bank-to-bank platform” in 2007. We were the first in the country to adopt the Equator Principles in 2008 and we created an environmental and social risk management system in the following year under the guidance of the Equator Principles. We offered the country's first low-carbon credit card and innovative cash management services in 2010. It has been an extraordinary five-year journey in our search for sustainable finance. We promoted strategic changes in our business development and profit models and implemented the strategic layout of “differentiated management” so as to continually drive sustainable development of the Bank.

Exploring sustainable finance: we expanded our strategic layout for sustainable financial operations in 2010, following the new trends of green and low-carbon economy, and opened up new financial domains and opportunities, forming our own operating characteristics and business brands, enhancing our risk management capacity and establishing our advantage in competitive differentiation in specific areas, thereby creating new business areas, quality assets and new sources of income.

Participating in global sustainable development: in 2010, the Bank actively engaged in multilevel exchanges with the government, participated in the exploration of sustainable development in the Chinese banking industry, broadened the channels of communication with our counterparts in the industry, reinforced the consensus on global sustainable finance, participated in the formulation of international standards and maintained good dialogues with non-governmental organizations, as we jointly work towards global sustainable development.

Looking to the future, sustainable development has become a focus in the world today and the Bank will continue to strengthen our confidence in achieving development, seek innovations in our development and endeavor to maintain rapid, coordinated and healthy development in all our businesses, so as to have a smooth beginning for our plans for the next five years and lay a strong and solid foundation.

President

Sustainable Development and Corporate Governance

The Concept of Sustainable Development

IB's corporate governance philosophy of sustainable development:

We consistently follow the Scientific Outlook on Development to deepen our understanding of the linkages between corporate social responsibility and our own sustainable development, proactively explore multiple approaches to fulfill our social responsibility, and cultivate harmonious relationships among the human, nature, environment and society.

—Gao Jianping, Chairman of Industrial Bank

The Bank recognizes that the connotations of CSR are closely linked to the principles of sustainable development. Both jointly expand the domains of traditional business ethics and enrich the contents of corporate governance. The responsibilities of commercial bank managers in terms of managing such banks as corporations are no longer just to maximize profits. They also need to coordinate all stakeholders at the same time. As special public enterprises, commercial banks rely on investments from shareholders and also benefit from the support from customers, employees and other stakeholders. In this sense, commercial banks should set social responsibility and sustainable development as their core strategy and value orientation, and protect the environment, conserve resources and benefit the society through the provision of products and services. They will find new business opportunities and profit sources in the process and expand their businesses, thereby achieving sustainable development.

Key stakeholders	Expectations and needs of stakeholders	IB's response
Regulatory authorities	Compliance in management and responsiveness to control policies.	Business integrity in compliance with the law; To support and cooperate with regulatory requirements; To support national economic development.
Shareholders	Stable returns; growth in value.	To conduct sound operation, and improves profitability; To maintain a strong ability to accumulate profits; To conduct active communication to enhance relationships with investors.
Customers	Service-oriented; create value; growing together.	To improve service standards and create brand quality; To provide differentiated services to meet diverse needs; To continue to seek financial innovation and promote sustainable financial products; To take the initiative to strengthen communication and enhance customer awareness of sustainable development.
Employees	Creation of a development platform to develop lifelong employability.	To improve our human resource system; To create employment opportunities; To safeguard the rights and interests of employees; To enhance staff capacity; To promote the corporate culture.
Partners	To complement each other's advantages for a win-win situation.	To vigorously develop a bank-to-bank platform to promote sharing of financial resources; To deepen cooperation with counterparts in the industry and spread the concept of sustainable development.
The environment and resources	To give play to its financial leverage effectively and promote harmonious coexistence between man and nature, the environment and society.	To promote all-round development of green credit; To explore green operation unremittingly.
The society	To hold the courage to take social responsibility, abide by and comply with laws and regulations, observe the highest business ethics and promote social harmony.	To make efforts in livelihood finance; To support education; To engage in charity work; To bring modern finance to the community.

The Process of Exploring the Concept of Sustainable Development in Corporate Governance

Looking back at the Bank's development process, there were three evolution and enhancements in general in its business philosophy. From seeing the interests of the shareholders as the first and foremost priority, to incorporating the interests of all stakeholders, and subsequently to promoting harmony between the environment, society and economy and sustainable development of the Bank, it was essentially a process of a bank gaining an awareness in the creation of value at different stages of its growth.

STAGE 1

From its establishment in 1988 to the mid- and late 1990s, to accommodate the needs of the country for economic and financial reform and development, the Bank kept expanding its capital through investments from its founders and attracting new investors, thereby laying the foundation for its early development. At this stage, the main objective of the corporate governance was optimizing shareholder value.

STAGE 2

In the past decade, particularly since introducing strategic investors in 2003, the Bank gradually realized through practice that as special public enterprises, commercial banks benefit from the support from their shareholders, customers, employees and various members of the society in their day-to-day operations, and at the same time, their operating results are also linked to the interests of all these stakeholders. Hence, the objective of corporate governance of the Bank cannot focus solely on its shareholders. It should also take into consideration the common interests of all stakeholders.

STAGE 3

Since its public listing, the ownership structure of the Bank has become more diversified. The Bank has greater room for development and it also shoulders greater responsibilities. Against the backdrop of increasingly prominent environmental issues such as global warming, the Bank embarked on further reflections on the relationship between its social responsibility and sustainable development. It explored fulfilling its social responsibilities through innovations in its business model and creating a harmonious co-existence between man and nature and the society, as well as established a governance concept of sustainable development, thereby laying the foundation for its sustainable development at the source.

May 2006

The Bank cooperated with the IFC and creatively introduced the loan principal sharing mechanism, offering the first energy saving and emission reduction loan in China.

June 2007

With its pioneering practice in energy saving and emission reduction, the Bank was nominated for the "Sustainable Bank in Emerging Markets" and "Sustainable Deal of the Year" awards in the 2007 Sustainable Banks award jointly organized by the Financial Times (UK) and IFC in London, and it won the second prize for "Sustainable Deal of the Year", becoming the only Chinese financial institution to win the honor to date. The award presentation ceremony in London was a global stage with sustainable finance as its core. Financial institutions from all over the world gathered and exchanged good practices and advanced experiences in sustainable finance, including the Equator Principles. After the ceremony, leaders of the Bank visited the HSBC headquarters and conducted in-depth exchanges of key issues such as the concepts, scope and adoption of the Equator Principles.

November 27, 2007

Mr. Li Renjie, President of the Bank, met Ms. Rachel Kyte, IFC's Director for Environmental and Social Development, and Mr. Richard Ranken, IFC's Director for East Asia and the Pacific, and conducted meaningful discussions on exploring sustainable finance and adopting the Equator Principles.

December 14, 2007

Mr. Gao Jianping, Chairman of the Bank, met Mr. Robert B. Zoellick, President of the World Bank, in Guangzhou and conducted another high-level dialogue on the significance and feasibility of Industrial Bank adopting the Equator Principles.

April 2008

Mr. Gao Jianping, Chairman of the Bank, summarized at a shareholders' meeting the practice and exploration of sustainable finance at the Bank, and put forward the guiding principles for the Bank's concept of governance, i.e. "to thoroughly apply the scientific outlook on development, deepen the understanding of the relation between the Bank's social responsibility and its own sustainable development, actively explore ways to promote the practice of social responsibility at the Bank, and create a harmonious relationship between man, nature, the environment and the society."

October 31, 2008

The Bank officially announced to the public its commitment to the Equator Principles, thereby becoming the first financial institution in China to adopt them. With that, it made the great leap forward in its development as it became the first Equator Principles Financial Institution in China that provides energy effective financing and with that as a foundation, it continued to deepen its exploration for sustainable development in its practices.

May 2010

In an exclusive interview with Modern Bankers, Mr. Gao Jianping, Chairman of Industrial Bank, talked about the origin, evolution and elevation of the Bank's "green" concept of governance and shared the Bank's development history in its practice of the concept.

The CSR Implementation Featuring with Fulfilling Obligations When Making Profits

There are three types of fulfilling social responsibilities by enterprise, i.e. the classical type, response type and strategic type. The classical type believes that the enterprise should place top priority on its shareholders and its sole responsibility is to generate legal profits for its shareholders. The response type passively sets codes for responsibility due to social pressures or responds to the needs of different interest groups through environmental, occupational health, social responsibility certification, etc. The strategic type adopts a positive, proactive approach to fulfill their social responsibility, i.e. they ensure that their own business interests are consistent with the interests of the society by implementing product or service innovations, technological innovations, process innovations and other value chain innovations, and they also seek business opportunities while committing themselves to operations that are environmentally and socially sustainable, and in turn driving themselves towards sustainable development. These three types are a gradual development process.

The Bank recognizes that only by gaining an understanding of CSR from a strategic perspective and organically combining CSR, corporate development strategies and business model through proactive management, can it exert greatest positive social impact and achieve sustainable development at the same time. Based on this understanding, the Bank's Board and senior management incorporated social responsibility and sustainable development into the Bank's development strategies and actively carried out sustainable financial innovation, such as launching the country's first low-carbon loan product, becoming the first bank in the country to adopt the Equator Principles, establishing the first professional sustainable financial operator, etc, thereby making the great leap forward from providing energy efficiency financing to becoming an Equator Principles Financial Institution. It also put forward the approach of fulfilling social responsibility which advocates emphasis on both compassion and profits. In other words, it promotes "combining social responsibility with the Bank's businesses, making sure that this is implemented in specific areas of its management and that it seeks business opportunities when fulfilling its social responsibility, thereby exploring a business model and a model for fulfilling social responsibilities that ensure a win-win situation for both the Bank and the society that is can be sustained and developed".

The Bank now has a sound governance structure in which responsibilities are clearly defined at all levels of internal governance, with effective checks and balances in place and operations are coordinated. Under the strategic guidance of the Board and its motivation, the corporate governance concept of sustainable development has been incorporated into the Bank's philosophy and implemented in its management systems, business processes, financial tools, product innovations, reporting system, and many other innovative activities.

Sustainable development in business expansion

Focusing on social and environmental risk considerations when making major decisions on investment and loan decisions, thereby enhancing the quality of the Bank's assets portfolio. Exploring new business opportunities in financial innovations and actively developing financial products and services that promote social progress and are environmental-friendly.

Implementing sustainable finance through social innovations

Giving full play to its advantages as a financial institution and promoting financial knowledge through "Modern Finance in the Community" and other activities; supporting education by establishing learning sites for undergraduates, establishing charitable grants, offering student loans, etc.; supporting charitable cause in the form of intellectual, material and financial support to medical, educational, cultural and other public services.

Fulfilling social responsibility by abiding by the three principles of "moderation", "development" and giving consideration to the "profit incentive" simultaneously, defining the standards gradually and promote deepening of the same to suit local circumstances

Continuing to establish market advantages in energy efficiency financing, carbon finance, SME lending, bank-bank cooperation and other innovations in products and services, based on business development plans and the progress in realizing such plans; introducing environmental and social risk management into the system with the Equation Principles as the entry point; combining China's national conditions and the Bank's capacity in the process of promoting of financing for energy saving and emission reduction projects and in implementing the Equator Principles, and gradually exploring and promoting the sustainable financial model in all operations.

2011 marks the beginning of the Bank's 2011-2015 development plans. The Bank's goals for its development in the next five years will be to build a first-class bank and create centuries of prosperity; actively respond to developments and changes in the business environment; undertake comprehensive, systematic and deepened promotion of strategic change in business development model and profit model; maintain sustained and rapid development of its businesses while promoting a general enhancement in its professional competence and core competitiveness as well as comprehensive value and returns; establish a mainstream banking group that has a solid foundation, is structurally coordinated and professionally outstanding, distinctive, financially strong and responsible. It will continue to give full play to its distinguishing features in key areas such as green finance and sustainable finance.

CSR Management System

Attaching Great Importance to Fulfilling CSR from the Strategic Perspective

In 2010, the Bank's articles of association stated that one of the duties of the executive committee of the Board of Directors was to "study and draft the Bank's strategies and policies with regards to social responsibility and sustainable development, and supervise, inspect and evaluate how the Bank fulfills its social responsibility". This affirmed that social responsibility and sustainable development are the Bank's core philosophy and value orientation, and they are used to guide its management and business activities, giving full consideration to the needs of multiple stakeholders, establishing its longterm goal of "building a first-class bank and creating centuries of prosperity", and endeavoring to become a comprehensive bank with "sound operation, standardized management, rapid growth, leading services, distinctive features, and outstanding returns".

Ensuring CSR is Fulfilled through Organizational Structure

The Bank set up a steering group for social responsibility that is headed by Mr. Gao Jianping, Chairman of its Board of Directors. Mr. Li Renjie, President of the Bank, and Ms. Bi Zhonghua, Chairwoman of the Supervisory Board, are the deputy heads. The group further strengthens organizational leadership in fulfilling the Bank's social responsibility. It establishes a sound working system for fulfilling such responsibility, enhances the organization, coordination and promotion of sustainable finance, and systematically drives the Bank's effort in fulfilling its social responsibility.

In terms of organizational structure, the Bank specially set up a sustainable finance bureau at its headquarters to oversee the full implementation of environmental and social risk management and the Equator Principles, assist owners of projects by the Bank to which the Equator Principles apply so as to enhance their environmental and social risk management capacity, and explore how the concept of environmental and social risk management can be effectively passed on to the Bank's customers and their supply chain. At the same time, the Bank specially set up a sustainable finance center to focus on the development and market promotion of energy efficiency financing, environmental and carbon financial products, as well as to seize market opportunities and focus its resources on strengthening financial product innovation, so as to customize integrated service platforms for different types of customers.

Promoting the Fulfilling of CSR through Operational Management

The Bank incorporates the concepts of social responsibility and sustainable development into all aspects of business management, continues to promote changes in business philosophy and business practices, prompting the entire industry to change from paying attention to immediate goals to paying attention to both immediate and long-term goals, from placing greater emphasis on results to placing greater emphasis on both results and the process, and from placing greater emphasis on business goals to placing greater emphasis on business goals as well as customer and product goals; prompting the entire industry to seek to improve customer marketing and product service standards according to the directions of competitive differentiation, refined marketing, professional operation and intensive management, seeking to increase comprehensive income, returns from the investment of resources, establish a professional image and gain recognition from the market and its peers, through effective products and services.

Promoting the Concept of CSR in Corporate Culture

The Bank's culture system that focuses on social responsibility and the establishment of mission, vision, core values, operational concept and spirit of enterprise creates a corporate culture that effectively carries the concept of CSR, thereby fostering a culture concept of sustainable development in the industry.

In 2010, the Bank's governance efforts gained the recognition from various parties, winning it major awards such as be ranked fourth in the Corporate Governance Assessment for the Top 100 Chinese Listed Companies for 2010, Financial Institution with the Best Corporate Governance, second place in the Investor Relationship for Top 100 Chinese A-Share Companies, Contribution to Social Responsibility, Innovation in Investor Relationship, etc.

In September 2010, the Bank and the magazine Directors & Boards jointly planned the cover story "Sustainable Finance: the Business Rationale of the Industrial Bank" which systematically introduced the Bank's concept of sustainable development and introduced business model innovation under the guidance of such a concept.

Management

- ◎ Consolidating Foundation of Internal Control and Compliance Management
- ◎ Improving Comprehensive Risk Management System
- ◎ Leading Environmental and Social Risk Management Practices
- ◎ Raising Emergency Management Capability

Consolidating Foundation of Internal Control and Compliance Management

Legally compliance management shall ultimately be the foundation and premise for the Bank to fulfill its social responsibility and realize sustainable development. In 2010, with system management as the starting point and utilizing opportunities presented by the advocating of the internal control and compliance system and the “year of internal control and case prevention system implementation” activity, the Bank persisted in the comprehensive build-up of its compliance management system, and through various types of channels, opinions and advice were provided with respect to the Bank's major management decisions and various business activities, thus promoting constant improvements to the internal control and compliance management standards.

Business Development and Advanced Internal Control

In 2010, the Bank continued to build up and improve its internal control system, so as to ensure the safe and stable operation of its business management system, and thereby promoting the realization of the Bank's sustainable development strategy.

Continuing System Clean-up Work and Strengthening the Internal Regulatory Coordination and System

In 2010, with the opportunities presented by the advocating of the internal control and compliance system and the “year of internal control and case prevention system implementation” activity, further steps were made to strengthen various system types at the headquarters and branches, continue with the clean-up and consolidation of normative documents, gradually advance the standardization and regulation of the day-to-day system management work, strengthen the compliance, operation, regulation and effective review of newly introduced systems, promote the ability to effectively dock and form a positive cycle for at various working stages within the system, including project approval, review, post-evaluation and feedback, horizontally strengthen the management linkup between the headquarter and branches and vertically build up an information transmission mechanism with the branches, so as to allow the Bank's internal system to better conform itself to external regulatory changes and service the Bank's business development.

Further developing the responsibilities of internal control committee, strengthening communication and exchanging of internal control information, push for the tracking and addressing of internal control issues

The rectification of identified issues is one of the more direct objectives in the operation of the internal control system, and also forms the core of the internal control management's ability to continue improving. Through the effective operation of its internal control committee work mechanism, the Bank further expands the existing internal control information collection channels, actively transmitting results of headquarters and branch checks and internal control assessments, providing high-quality internal control reports to the management in a rapid, comprehensive and complete manner, identifying, preventing and resolving business risks in a timely manner; and through measures such as periodic follow-up and tracking, actively promote the rectification of internal control issues, thus further improving the Bank's internal control reports and corrective mechanism.

Actively Promoting the Pilot Implementation of the Internal Control and Compliance Management System Project, and Improving the Internal Control Self-assessment Mechanism

Since April 2010, the Bank has carried out pilot trials at its Nanjing and Chongqing branches, further refining and improving the results of the buildup of a compliance management system, enhancing business processes, raising the Bank's business management standards, and gradually building up an internal control self-assessment mechanism that fulfills the requirements of the “Notes on Basic Criteria of Enterprise Internal Control”, through scientific internal control selfassessment methods that may be sustainably utilized, major pitfalls in internal control are identified in a timely manner, and feasible corrective measures may be adopted to reduce risks. Currently, the pilot branches have completed assessments at the enterprise level, as well as the recording and relevant testing work concerning major business and management process documents at the process level.

The Bank launches the “year of internal control and case prevention system implementation activity”.

On June 21 2010, the Bank held the “2010 year of internal control and case prevention system implementation activity” mobilization meeting in Fuzhou City, Fujian Province. In accordance with the activity program, the activity shall carry out system refining, lecture and learning, self-check and self-correction, situational report, supervision of checks, improving the orderly advancement of seven stages in total, so as to further raise the internal control and case prevention awareness of the Bank’s staff members, improve the Bank’s internal control and case prevention system and operational process, continue strengthening execution powers, and effectively building a long-term and effective mechanism for internal control governance and case prevention. In the mobilization speech by Mr. Kang Yukun (first from the right) the Bank’s Vice President, he emphasized the conscientious implementation of the mobilization conference’s spirit and development of specific measures by institutions and functional departments at each level, thereby achieving “solid understanding, solid organization and solid execution”, while preventing “perfunctory actions and bias” and pursuing effective results.

Consolidating the Compliance Management Foundation and Building a Comprehensive Compliance Management System

In 2010, the Bank continued to strengthen its compliance foundational management work and raise the effectiveness of compliance management, so as to lay a solid foundation for the comprehensive fulfillment of its social responsibility, improve the operating mechanism of a comprehensive compliance management system, explore the best compliance and risk management practices that suit the Bank’s characteristics, and through innovation in management methods, promote a tighter link between compliance management work and business development, thus demonstrating that compliance creates value and ensuring the Bank’s health and sustainable development.

Actively Cultivating a Compliance Culture and Strongly Promoting Compliance Training and Education

The Bank believes that the cultivation of a compliance culture is an ongoing and dynamic process, instead of a one-time effort, under the premise that a considerably stable set of compliance core values must be maintained, improvements are constantly being made, especially constant adjustments which incorporate the actual circumstances faced by the Bank, thus forming a dynamic safety net that guards against various irregularities. A bank’s compliance management would be most effective only when the corporate culture for the entire bank emphasizes strict adherence to high moral standards. During the reporting period, the headquarter alone organized more than 40 training sessions, with their content covering legal matters, compliance management, system management, phase II compliance systems, compliance monitoring, internal control assessment pilot and many other areas.

Improving and Perfecting Compliance Management Structure and Defining Responsibilities

To further define the job scope of the compliance management functional departments at the branches, better realize the related responsibilities, and promote the orderly implementation of compliance management work, the Bank has issued guidelines for the legal and compliance management functional departments of its branches, which carry out further standardization of matters concerning the compliance management functional departments, including requirements, division of responsibilities and staffing.

Actively Promoting the Realization of Compliance Assessment and Accountability

Mechanism, and Improving the Compliance Management System

To actively promote the realization of compliance assessment and accountability mechanism, the Bank has, during the reporting period, further refined and defined the assessment content of compliance management work directed at operators, periodically conducting compliance assessments on operators and including these assessment results in the consolidated management evaluation categories for branches. With respect to irregularities uncovered during onsite and offsite compliance monitoring processes, an accountability system will be strictly implemented and the execution power of the system will be strengthened.

Consolidating the Results of Previous Activities and Ensuring the Effective Realization of a Comprehensive Compliance Management System

In 2010, the Bank continued to consolidate the results of the buildup and promotion of a comprehensive compliance management system, introducing supporting systems to further refine and define the compliance management responsibilities for the headquarter and branches. A headquarter contact person system was established, with the contact being responsible for communicating and guiding the branches, this assisted the branches to focus on implementation of daily updating and maintenance work for internal & external regulations and system documents. To continue the inculcation of compliance concepts, the Bank paid great attention to the establishment of a continuing system of training and retraining, with specialized training having been implemented in seven branches for 2010.

Further Implementing Compliance Monitoring Pilot and Enhancing the Compliance Monitoring Normalization System

With a focus on raising the scientific, refinement and professional level of compliance monitoring, the Bank has adopted various specific measures to enhance the compliance monitoring normalization work system. In 2010, upon the foundation of the experience garnered from the compliance monitoring pilot work previously conducted and completed in the Shanghai, Shenzhen and Chongqing branches, the Jinan and Xi'an branches have been added as compliance monitoring pilot branches, thus continuing to expand the demonstration effect of the pilot work.

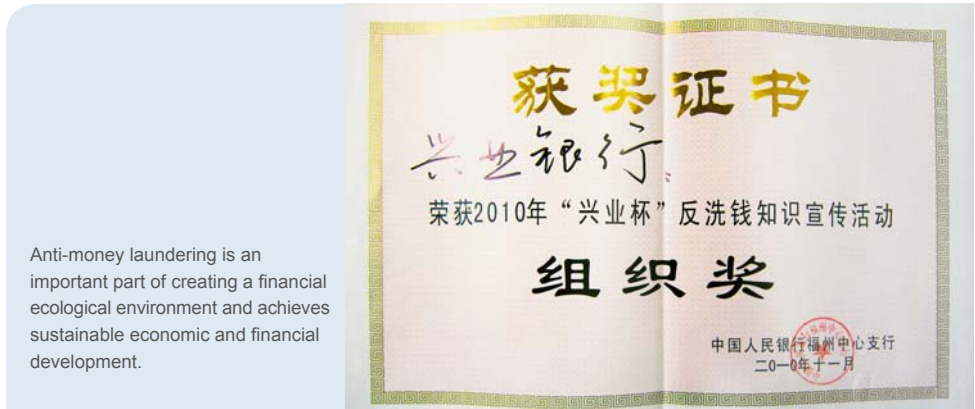

Operation mode and specific measures of compliance monitoring

Operation mode	Specific measures
Strengthen accumulation of basic compliance risk data ▶	Establish a compliance risk database, providing data accumulation and support for compliance risk identification, monitoring and early warning.
Establishment of key compliance risk indicator system ▶	Explore the establishment of a key indicator system for compliance risk management, and with internal and external checks as the basis, and focus on the various aspects of risk issues, including self-check identification rates, rectification rates, problem identification effectiveness, compliance risk matrix layout, design flaws and implementation defect distribution.
Implement risk point reidentification and reassessment ▶	Combine regular assessment and key assessment, organize and implement risk point reidentification and reassessment in a targeted manner.
Pay attention to establishment of compliance check mechanism ▶	Utilize the opportunity presented by the standardizing of various business checks for the branches to explore the establishment of a compliance check mechanism and fully bring out the functions of the first and second defense line for compliance management.
Enhance compliance risk reporting mechanism ▶	Distinguish focal points of compliance and risk management, constantly perfecting the matrix-style compliance and risk reporting mechanism; to raise the quality of compliance reporting, supporting compliance reporting guidelines have been issued, which collects and compiles the compliance reporting template.
Strengthen capability buildup of compliance management team ▶	Implement specialized training for branch compliance managers to improve the capability to interpret the work background, work requirements, work process and responsibilities for the compliance monitoring pilot.
Strengthen effective interaction with local regulatory authorities ▶	Give full play to the role of external monitoring and external pressure is fully brought out, through the regulatory authorities' assessment of the adequacy and effectiveness of the buildup of the Bank's comprehensive compliance management system, creating a more appropriate external regulatory environment for the Bank's compliance management.

Complete Upgrading and Replacement of the Compliance Management Information Platform and Continue Strengthening the Compatibility between the Information System and Compliance Management

In 2010, the Bank completed the upgrading and development of the compliance management Phase II IT system, which covered functions such as system management, legal affairs management, system document management, internal control management, compliance risk management, environmental and social risk management. At the same time, the Bank emphasized the raising of the scientific and operational aspects of the system functions, continuing the perfecting and enhancing of system functions, strengthening the system's utilization efficiency with respect to the information and data, so as to better identify and prevent compliance risk, and provide a solid foundation and guarantee for the sustainable development of the Bank.

Conscientious Performance of Anti-money Laundering Obligations

In 2010, the Bank persisted in the due diligence performance of its anti-money laundering.
Strengthened buildup of anti-money laundering internal control system, formulated and issued "Industrial Bank Management Rules for Customer Identification and Customer Identification Information & Transaction Record Preservation", "Industrial Bank Working Guidelines for Analysis and Screening of Suspicious Transactions" and "Industrial Bank Operating Procedures for Anti-Money Laundering Monitoring Data Submission System", consolidated working foundation for anti-money laundering.
Accelerated stock inventory cleanup and verification work, carried out batch verification and matching of customer information in stock inventory, verified number of stock customers as 7.6 million and control accounts as 930,000.
Speeded up informatization process of anti-money laundering work, successfully completed upgrading work for anti-money laundering monitoring data submission system, successfully activated blacklist management module of foreign currency payment and settlement platform, and significantly raised efficiency of anti-money laundering monitoring and reporting work.
Increased training and promotion level for anti-money laundering, more than 33,000 relevant personnel were trained in anti-money laundering work in 2010, at the same time, anti-money laundering promotional activities were actively conducted at the enterprise and community level to an audience number in excess of 170,000.

The Bank sponsored the 2010 Fujian Province Financial Institution Anti-money Laundering Knowledge Competition. Branches within the province were active in preparing for and participating in the competition, and obtained excellent results: the Ningde branch, Putian branch, Quanzhou branch, Longyan branch and Sanming branch received the first class award for their local division's professional group category; the Fuzhou Branch, Ningde Branch and Putian Branch received the individual first grade award; the Quanzhou Branch, Zhangzhou Branch and Sanming Branch received the individual second grade award.

Improving Comprehensive Risk Management System

Risk Management Policy

The Bank is constantly improving its risk management system, raising its overall risk management capability, and ensuring the sustainable development of its various businesses. In 2010, upon the foundations of the Bank's existing credit risk management policy, market risk management policy and operational risk management policy, it added risk management policies and systems in the area of environmental and social risks, compliance management, IT risk, reputational risk and outsourcing risk, and continued to improve and enrich the comprehensive risk management strategy system. At the same time, upon the foundations of the "Risk Management Strategy" issued by the Bank, it formulated the "2010 Risk Management Strategic Implementation Work Plan", which covered 40 specific tasks which covered the organizational structure, institution building, management procedure, system building, risk culture and team building, and promoted the effective implementation of risk management strategy through periodic follow-up and feedback.

Risk Management Guiding Principles

Adhering to the core philosophy that "risk management creates value", the strategy for risk management, quality adherence, efficiency, scaled coordinated development, and equal emphasis on the realization of business development and risk control, was strengthened from an overall perspective of development; adhering to a "healthy" risk appetite, actual risks are mastered with the constant raising of risk management standards, controlling various types of risks at a tolerable level and creating value for the society, shareholders, customers and staff members.

Risk Management Milestones

The Bank's risk management shall satisfy the requirements of business development strategies, and promote healthy and sustainable development for all lines of business.

The Bank shall establish a risk management platform with a sound system, advanced technology, highly effective process and excellent service, thus realizing the three key transformations including the transformation from the initial stages of comprehensive risk management to a more complete comprehensive risk management, the transformation from post-incident risk control to active management and risk management, as well as the transformation from experienced qualitative management to quantitative management that combines quantitative and qualitative elements.

By 2015, the Bank will be a leader in risk management within the domestic banking industry through its efforts to further improve its comprehensive risk management system, effectively control various types of risks, and become a commercial bank that complies with the New Capital Accord.

Risk Management Organizational Structure

Based on the Basel II Accord, the Bank established and improved its comprehensive risk management organizational structure which includes the Board of Directors, senior management, business departments, risk management functional departments and internal audit departments.

- The Board is the highest decisionmaking body with respect to the Bank's risk management, undertaking the ultimate responsibility for the supervision of the Bank's risk management system. The senior management is responsible for executing the risk management strategies, policies and specific requirements as approved by the Board;
- The business units and operating divisions specifically serve as the first line of defense in credit risk, market risk and operational risk management, undertaking direct responsibilities for risk management, performing advance risk prevention and control functions, and through a risk management process which combines self-assessment, self-check, self-monitoring, self-rectification and self-training, realize the organic fusion of business operations and risk management;
- The risk management functional departments serve as the second line of defense, carrying out overall planning for the entire bank's internal risk control checks, performing supervision, inspection and assessment function on the first line of defense, and guiding the active strengthening of risk prevention by business units and operating divisions at each level;
- The internal audit department will serve as the third line of defense, providing independent and objective monitoring, assessment and advisory services with respect to the Bank's risk management.

Quality of Credit Assets

Fiscal year	2008	2009	2010
Loans (in RMB100 million)	4,993.86	7,015.97	8,543.39
Non-performing loans (in RMB100 million)	41.49	37.79	36.16
Non-performing loan ratio	0.83%	0.54%	0.42%
Provision coverage ratio	226.58%	254.93%	325.51%

Risk Management Status and Specific Objectives

Key risks management	Management status and measures	Management objectives
Credit risk management	Strengthen credit flow management and guide branches in their credit structure adjustments; strictly uphold customer entry standards, strengthen review of enterprise entities; strengthen industry quota management and control loan concentration risk; implement credit risk research and checks to understand and prevent credit risks; strengthen overall process management of credit business; implement reform of credit approval system, raise professional standards of credit approval; strengthen risk classification work, ensure adequate provisions.	Improve credit risk management system, raise professional standards and precision level of credit risk management, continue strengthening overall process management of credit business, realize the favorable scenario of "reasonable growth in scale, steady rise in quality, continued structural enhancement, adequate provision for impairment".
Market risk management	Strengthen asset-liability management, raise accuracy of cash flow management; improve identification, measurement, monitoring and control methods for market risk; strengthen interest rate risk management and capital cost management.	Establish a market risk management system that is compatible with the Bank's risk management strategy; improve market risk management structure, policy, process and methods, thus fulfilling requirements of the New Capital Accord and regulatory requirements for market risk management; realize economic capital calculation and distribution for market risk, and realize optimal risk-adjusted rate of return.
Operational risk management	Strengthen buildup of operational risk governance; establish operational risk management model that matches operational risk attributes and combines concentration and diversification; improve operational risk management system; actively explore practical application of operational risk methods and tools, improve advance warning and monitoring system; strengthen operational risk accountability and performance assessment; prevent potential operational risks at each business line; raise concentrated management of operational risk, promote professional and concentration level of operations.	Establish operational risk management system that is compatible with the nature, scale and product complexity level of the Bank's businesses; continue raising operational risk culture awareness and technical level of all staff members.
Emerging business risk management	Improve emerging business risk management planning, improve risk management mechanism; carry out forward-looking overall planning with respect to risk resource allocation, risk management control objectives and risk control measures at various business development stages; improve management method, continue raising emerging business risk management standards. Perfect buildup of system, standardize business operations and strengthen internal control for emerging businesses.	Improve triggering mechanism for emerging business risk management, thus ensuring development in new business fields on the premise of controllable risk; strengthen risk control for all aspects of emerging businesses, including its approval, development, sales and operations; select comparatively matured risk management tools and methods in the market; incorporate emerging businesses into the Bank's comprehensive risk management system.
Subsidiary risk management	Subsidiaries combine their industry operating characteristics and the actual conditions of their own businesses to establish their risk management system and internal control system, as well as their management process and management tools; periodically conduct follow-up monitoring and assessment analysis of various types of risks faced in business operations; formulate a complete management system for related transactions and strictly enforce it.	Incorporate subsidiaries into the Bank's comprehensive risk management system; strengthen consolidated management between the Bank and its subsidiaries, including the management of capital adequacy ratio, substantial risk exposure, internal transaction, as well as other risks such as liquidity risks, market risks, operational risks, legal risks and reputational risks.

New Capital Accord Project

In 2010, the Bank formulated IRB-related (internal-rating based) systems, such as the “Industrial Bank Non-retail Customer Internal-Rating Based Management Regulations”, thus establishing a Foundation IRB implementation system; IRB system implementation plans were formulated for five areas including risk exposure classification, contract breach recognition, rating process, identification of risk mitigation and loss data collection, thus realizing the preliminary establishment of IRB system between the Company and its customers within the industry; the Bank promoted the development of an IRB system, successfully implemented system development and overall testing, and fundamentally realized the main functions of the system modules.

The first stage non-retail IRB component of the Bank's IRB (Foundation) project is expected to be formally launched in April 2011. After launching the system, IRB will become an important risk management tool and measure for the Bank's credit risk management, according to the specific upgrade path for risk management standards that emphasizes “customer rating first, business credit second, actual utilization later”, the Bank will promote the separation of customer rating and review & approval, and establish a rating-first approval-later mechanism for its credit business. The promotion and implementation of the IRB approach marks an important step in the implementation of the New Capital Accord, which will assist in raising the Bank's risk management standards.

In 2010, the Jinan Branch gradually established a risk management framework for remote branches according to the requirements of provincial governing bank. The effectiveness of risk management for the entire year was significant, with the nonperforming loan ratio achieving new lows. On May 28 2010, the Jinan branch was awarded the “Excellent branch – Risk control award” by the “Modern Bankers Magazine”.

Leading Environmental and Social Risk Management Practices

The Bank believes that environmental and social risk management will be of key importance in ensuring sustainable financial development, and will also be a powerful measure to improve the management model and raise management capability. In 2010, the Bank persisted in the implementation of environmental and social risk management systems, and continued to expand its management model, especially by bringing in IT-based process management through technological innovation, thus continuing its efforts to brand itself as a "Green Bank".

Environmental and Social Risk Management System

Environmental and Social Risk Management Policy

The Bank's environmental and social risk management policy states that: the Bank shall continue to pay attention to environmental and social issues in the credit business, striving to develop its financing business in a manner which will be beneficial to the environment and society, expanding its business according to the sustainable development concept, and persisting in the pursuit of an equal emphasis on economic efficiency and performance of the enterprise's social responsibilities.

The Bank's commitment to environmental and social responsibilities :

Strictly adhere to our country's environment-related and society-related legal standards, and ensure the business's compliance with the law.

Strive to direct funding towards sustainable projects which will benefit the identification and resolving of economic, environmental and social risks, actively advocate ecological protection, ecological development and green industry financing, and continue to perfect financial tools.

Actively assist business partners, which carry identical viewpoints and commitments with respect to sustainable development, to resolve problems relating to the environment and society, and provide related financial products and services, including assistance to corporate customers to improve their environmental and social management systems and the providing of environment-related financial investment products to retail customers.

Strive to build a conservation-based bank, promoting energy-saving emission-reducing behavior within internal management, and advocating environmental and social risk awareness in the corporate culture.

Continue to pay attention to and constantly improve environmental and social risk management measures, conduct periodic reviews and revision in response to constantly changing external conditions and information, so as to ensure the full applicability of the Bank's environmental and social management system.

Standards Applicable to the Bank's Environmental and Social Risk Management Policy

External standards: Our country's legal standards concerning the environment, health, safety, as well as other standards relating to bank credit, this mainly includes laws, regulations, rules and other regulatory documents.

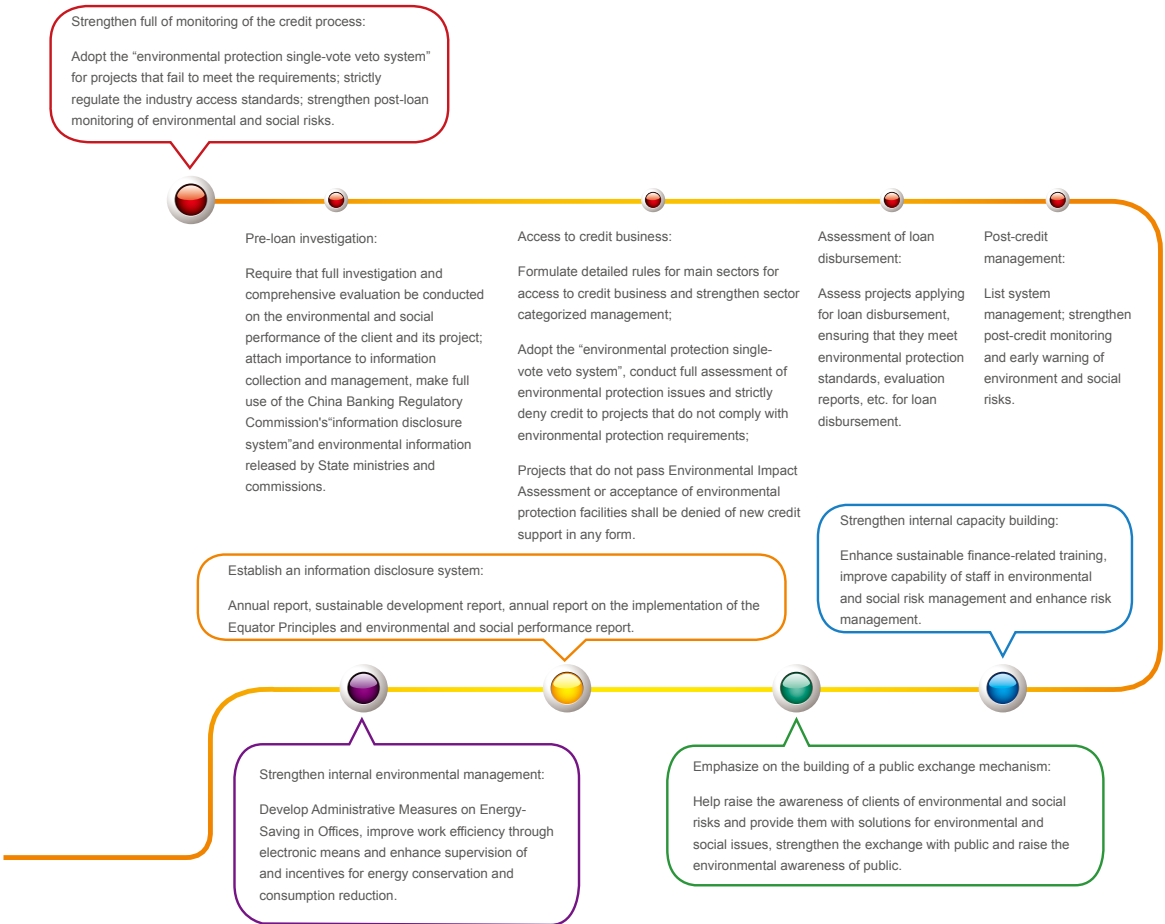

Internal standards: The Bank's credit guidelines, risk management systems, operational procedures and internal management standards that relate to environmental, health and safety issues.

Special standards: "Equator Principles", as well as International Financial Corporation's "Performance Standards on Social & Environmental Sustainability" and "Environmental, Health and Safety Guidelines".

Environmental and Social Risk Management Organizational Structure

Environmental and Social Risk Management Measures and Operations

Realizing Environmental and Social Risk Management Electronization

As environmental and social risk management is an important part of the comprehensive compliance management, it possesses the characteristics of high specialization, voluminous review materials and wide participation; one of the Bank's main task since 2009 till now is to explore methods to further improve the environmental and social risk management system through effective process management and advanced electronic management model.

For the Bank's environmental and social risk management module (hereinafter referred to "ESRM module"), projects applying Equator Principles are its specific management targets, with a strong emphasis on highly efficient process management as the objective, conducting system identification, assessment and overall process control environmental and social risks through process guidance and utilization of IT measures, and carry out process reengineering and innovation on this foundation, thus maintaining the adaptability of the module in its new form.

The ESRM module's functions and basic structure: the Bank's ESRM module possesses three main functions which are project review, tool application and information management. Specifically, the module combines the requirements of the Bank's environmental and social risk management system, and carries out the IT transformation of process management for the pre-loan, loan, post-loan environment and social risk management, through core work processes such as preliminary management, environmental and social due diligence, review and post-loan monitoring, as well as auxiliary modules such as project management, expert management and assessment tools, all of which are set up within the module, staff members at the headquarter and branches are provided with effective management measures and tools, thus raising project management efficiency.

Raising Emergency Management Capability

The Bank has conscientiously implemented the state's "Emergency Handling Law", building and perfecting a emergency preparedness system, the headquarter and branches have formulated contingency plans which cover each business management field and links, including information leakage incidents, liquidity contingency management, credit, market and operational risks, accounting settlement, payment settlement, staff management, retail business, E-banking business, credit card business, financial operations, information systems, public health and logistics support, thus achieving the preliminary formation of a contingency preparedness system that fully encompasses vertical and horizontal components; the Bank has defined the handling bodies and division of responsibilities for emergencies, standardized the handling procedure for emergencies, strengthened the promotion and training of contingency management, and comprehensively raised its capability to prevent and control emergency risks.

In 2010, the Bank formulated the “Industrial Bank Key Information System Emergency Procedures”, building a key information system emergency management mechanism, striving to raise its early warning and contingency capabilities and ensuring the safe and stable operations of its information system; a comprehensive total of 135 disaster recovery exercises were conducted involving areas such as its information system, network, venue, power and fire control, with the exercises leading the local industry in terms of scope and coverage; it organized and implemented the EXPO and Asian Games technology protection, core business system disaster recovery exercise, contingency work for major items such as core business system data clean-up and restructuring, thus effectively promoting the raising of the Bank's integrated information technology emergency management standard and contingency handling capability.

To usher in the convening of the Asian Games, the Guangzhou Branch, upon the foundation of its existing payment system emergency plan, reintroduced the “Industrial Bank Guangzhou Branch Payment Settlement System Crisis Management Plan”, “Industrial Bank Guangzhou Branch Accounting Settlement Major and Abnormal Items Emergency Management Plan”, thus ensuring the safe and stable operation of the payment settlement system through improvements to the large & small payment system, check imaging system, E-commerce draft system, internal bank system emergency plan; the Bank established the Asian Games green channel service to facilitate the opening of accounts, usage and fund payment by foreign institutions and individuals, provide convenient and fast personal foreign currency exchange services, which particularly configured small sorters, that specifically recorded renminbi numbers, at network points located in the vicinity of Asian Games venues, thus further preventing counterfeit risk; during the Asian Games period, the Bank also appropriately raised the cash inventory level at each business network point, thus ensuring a sufficient supply of cash and change.

2010 was the year of the Shanghai World Expo, during Expo which lasted 184 days, the Shanghai Branch, under the backdrop of 48 operational failures within the financial industry, successfully completed its Expo information system security work and achieved the stellar results of zero failures and zero emergencies, earning the recognition of related institutions such as the People's Bank Shanghai Headquarters, People's Bank Shanghai Branch, Shanghai Expo Financial Services Office and Shanghai City Economic and Information Technology Committee, Shanghai Science and Technology Commission, Shanghai State-owned Assets Supervision and Administration Commission.

Promoting Development of National and Local Economies

2010 remains as the year for cope with the international financial crisis, maintaining steady and rapid economic development and accelerating the transformation of the mode of economic development. The Bank gave full play to the financial sector's role in the economy, fully supported the revitalization of local economies according to the country's economic development policies, and made great efforts to unify its own value and social values.

Aiding Economic Development in the Country

Supporting the Construction of Large-scale National Projects

The Bank continued to support national economic construction in 2010, embarking on a broad range of business cooperation with many large state-owned enterprises and providing them with enormous credit support, thereby making due contributions to the recovery and development of the Chinese economy.

The Bank entered into bank-enterprise cooperation agreements in 2010 with many large enterprises, such as Minmetals, China Aviation Oil, China Logistics, China Railway Modern Logistics and State Grid. It entered into new credit collaborations with a number of large corporate customers such as China Aviation Oil, China Coal, Minmetals, Sinolight and National Machinery Industry. As of end December 2010, its total loan to the top 50 enterprises was RMB467.6 billion, at more than RMB9 billion per customer on the average. This provided strong support to China's economic construction.

After it became eligible at end of 2009 to be entrusted with insurance funds, the Bank established a closer business relationship with insurance asset management companies in the exploration and discussion of projects such as Water Diversion from South to North, Beijing Land Reserve and China Railway Southwest, and they jointly promoted debt investments for insurance projects and real estate investments, thereby providing financial security for the national strategic planning and infrastructure construction.

Supporting the Development of Key Regions

Strengthening the Establishment of Branches in Western China

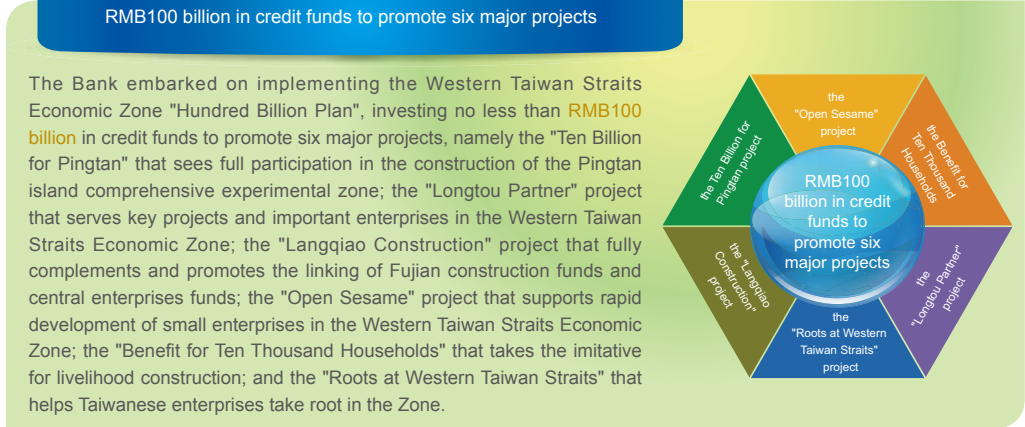

To improve its fulfilling of social responsibility, the Bank conducted active layout at western regions in the country that enjoyed special state support (such as Xinjiang, Inner Mongolia and Guangxi), emerging economic zones and urban clusters, key industry clusters, national industrial bases and energy bases, while it accelerated its layout of branches in key strategic regions, increasing the pace in which it set up branches at target cities that meet its standards, thereby supporting economic development in the western regions.

IB's network in western China

Providing a Full Range of Financial Services for the Construction of the Western Taiwan Straits Economic Zone

With the strategic vision of constructing the Western Taiwan Straits Economic Zone being elevated to a central decision and national strategy, the strategic importance of the Western Taiwan Straits Economic Zone has become even more prominent in the national development of China. To complement the strategic planning for the construction of the Western Taiwan Straits Economic Zone and give full play to its impact as a main force, the Bank fully integrates itself into the construction and serves such construction by relying on its advantages of national management.

In 2010, the Bank cumulatively provided **RMB4,056 million** in credit to the Pingtan comprehensive experimental zone; new credit of **RMB21,842 million** for the Fuzhou-Xiamen railway, the main power grid, highways and other key construction projects, with **RMB10,360 million** disbursed; it helped key projects and key enterprises in the province issue **4** short-term financing bills and medium-term notes, amounting to **RMB1,833 million**; it embarked in business collaborations with 7 construction companies under central enterprises, providing new credit of **RMB12.3 billion** in 2010; it actively supported the development of small enterprises in Fujian, with outstanding credit to small enterprises at **RMB62,989 million** as at end of December 2010, increasing by **RMB17,262 million** compared to the beginning of the year, as the Bank continued to lead its counterparts in the financial industry in new loans and outstanding loans to small enterprises in the province; it increases credit support to livelihood construction, with new credit of **RMB5.02 billion** in 2010, an increase of **RMB1.18 billion**; it increased credit to Taiwanese enterprises, with new credit of **RMB2.72 billion** in 2010, an increase of **RMB2.22 billion**.

To lend greater support to the provision of financial services to Taiwanese enterprises, further expand the areas and levels of its participation in economic and trade cooperation between Fujian and Taiwan, and better serve the construction of the Western Taiwan Straits Economic Zone, the Bank jointly held the contract signing ceremony with Taiwan business associations. Mr. Gao Jianping, Chairman of the Bank (back row, fourth from the left), Mr. Li Renjie, President of the Bank (back row, second from the right) and Mr. Lin Zhangyi, Vice President of the Bank, attended the signing ceremony. The Bank entered into a contract with Taiwan business associations and become the first national bank headquarters in China to enter into full business cooperation with Taiwanese associations in the province and this is yet another important move to provide financial service for the construction of two "Pioneer Areas" in the Western Taiwan Straits Economic Zone.

Promoting Local Economic Construction

Helping Local Development with its Financial Might

Northern China:

In 2010, the Taiyuan Branch launched the “Tiger Program”, lending full support to traditionally advantageous industries in Shanxi province, such as coal, equipment manufacturing, transportation, electric power and metallurgy, as well as leading enterprises such as Taigang, Taizhong, Shanxi Province Coal Transportation and Haixin. In the course of doing so, emphasis was paid to adaptability of products on the market and the Bank vigorously embarked on investment banking, notes, cash management, financial leasing, trade finance, supply chain and other emerging businesses, meet customer needs in a timely manner. The Shanxi communications department granted the Taiyuan Branch of the Bank with the contribution award for “Supporting the Construction of Key Highways” on June 17, 2010.

Southwestern China:

In January 2010, the Chengdu Branch signed a strategic cooperation agreement with the economic and information technology commission of Sichuan province for energy saving and emission reduction loan, whereby the commission will select and recommend to the Bank enterprises and business organizations that need energy saving and emission reduction financing and technology upgrading projects for energy saving and emission reduction, thereby providing support and assistance to the Bank on its financial services for energy saving and emission reduction projects. In cooperation with the government, the Chengdu Branch extensive promotes its energy saving and emission reduction business in Sichuan, providing close to RMB2 billion in energy saving and emission reduction loans for enterprises in Sichuan. The types of projects that took out such loans include cement waste residual heat power generation projects, urban sewage treatment projects, paper recycling projects and waste recycling projects, and they will reduce carbon dioxide emission by more than one million tonnes.

Central and Southern China:

The Bank was selected for the “Exhibition on 30 Years of Reform and Development Achievements in the Financial Industry in Shenzhen.

Northeastern China:

The Dalian Branch actively supports the construction of key government projects, such as the Shengli Road widening project, construction of the new sports center, infrastructure construction for the international business center for Xiaoyaowan at the development district, infrastructure construction at the Lushun motorcycle industry park, transformation of the Sanbali village in Lushun, and the road network construction project in the harbor industrial zone at the Changxing island in Dalian, thereby promoting Liaoning coastal economic zone development and urban construction projects.

The Shenyang Branch was named as one of the Top 100 tax-paying entity in Shenyang and it is rated as a Grade 3A tax-paying entity by the Shenyang state and local taxation bureaus.

Eastern China:

The Jinan Branch actively follows up on construction by the central and provincial governments for the Bohai Economic Rim and the Blue Economic Zone of Shandong Peninsula, increasing its investments to the Yantai Branch and Weifang sub-branch in those area and adopting tilted credit policies; it supported industrial structure adjustments by the local governments and provided RMB7.2 billion in direct and indirect credit to the restructuring of the Shandong Iron and Steel Group and reverse its structural backwardness; in 2010, it provided a total of RMB143.5 million in loans for strategic technology projects, and received the maximum incentive and compensation for technology from the provincial government to local joint-stock banks, lending strong support to the implementation of policies by local governments on the development of high-technology enterprises.

The Bank actively supports construction of the Wanjiang demonstration zone for industrial transfer and it set up its Wuhu Branch and Anqing Branch in 2010, thereby providing full support to the said construction and main economic constructions such as key industries and major projects, promoting good and rapid economic development at Wuhu and Anqing.

Central and Southern China:

The Zhengzhou Branch greatly supports the expansion of the Luoyang-Sanmenxia section (Henan and Shaanxi boundary) at the Lianhuo national expressway, and in the major projects of merger and reorganization of large coal enterprises in Henan, it provided close to RMB10 billion in loans to group enterprises such as Henan Coal Chemical Industry Group Co., Ltd, Zhengzhou Coal Industry (Group) Limited Liability Company and Zhong Ping Energy Chemical Group, thereby supporting the rapid economic development in the central plains economic region.

Eastern China:

To provide full support to the economic and social development and construction in Fujian, the Bank increased key support and continued credit to regional landmark projects such as the Fujian high-speed, power, Fuzhou-Xiamen railway, the Straits International Convention and Exhibition Center, the central business district at the north bank of Minjiang, Fuzhou wholesale agricultural logistics center, Gushan Bridge and Lianban sewage treatment plant.

Mr .Lin Zhangyi, Vice President of the Bank (first row, first from the left), represented the Bank to sign a cooperation agreement with the Fujian Provincial Department of Science and Technology on December 2, 2010 to jointly build a new platform for financial services technology and its industrial development so as to promote the integration of financial innovation and technological innovation in support of SME development in the province. According to the agreement, relying on small enterprise business franchisees set up by 9 municipalities and districts in Fujian, the Bank will provide priority support to science and technology parks, science and technology enterprises, "Three High-Tech and Six New" SMEs and project construction recommended by the Fujian Science and Technology Department, through a range of integrated financial solutions such as group financing, credit, and "IB Open Sesame" growth and list plans, and actively promote scientific and technological achievements and patent transformation, so as to promote the sustainable development of high-tech industries.

As at end 2010, the Bank's Fuzhou Branch had supported 20 key construction projects in Fujian, amounting to credit of RMB16,169 million and outstanding loan of RMB8,946 billion.

Cooperation between Governments, Banks and Enterprises in Promoting Green Finance

As the first bank in China to launch green credit products in support of energy saving and emission reduction efforts in the country, the Bank created green financial services and promotes green finance, working actively with governments and enterprises to promote energy saving, emission reduction and environmental protection.

In June 2010, the Shenzhen Branch and the Shenzhen Technology, Trade and Industry Commission, Finance Office and Recycling Economy Association jointly held a forum on low carbon economy and green finance, inviting a hundred outstanding enterprises in the recycling economy industry and promoting the Bank's green finance products.

On its opening day, the Changchun Branch jointly held with the Jilin development and reform commission and the provincial finance office the Jilin Low Carbon Finance Forum and signed framework cooperation agreements on energy saving and emission reduction with 7 enterprises that include Tonghua Iron & Steel Group Co., Ltd and Jilin Yatai (Group) Co., Ltd.

On January 6, 2010, the Shijiazhuang Branch jointly held the "First Joint Conference by the Hebei SASAC-sponsored Enterprises and the Shijiazhuang branch of Industrial Bank cum Special Report on Energy Saving, Emission Reduction and Corporate Financing" in conjunction with the Hebei SASAC with the theme of "Green Collaboration", for the purpose of promoting and implementing the cooperation agreement entered into between both parties that involves RMB20 billion in comprehensive credit.

The Hefei Branch and Anhui Win-Win Recycling Resources Group, the largest recycling resources group in Anhui province, signed a comprehensive cooperation agreement to promote the combined strengths of the groups, achieve optimal allocation of resources and promote the recycling economy.

In May 2010, the Hangzhou Branch and the Zhejiang economy and information technology commission jointly held the "Green Zhejiang, Ecological Economy" Zhejiang energy saving and emission reduction government-bank-enterprise strategic cooperation signing ceremony, for the active development of energy saving and emission reduction financing business, so as to assume the social responsibility of protecting the environment through actions, thereby achieving harmonious coexistence between man and the society and nature.

Increasing Support to Agriculture, Rural Areas and Farmers

Increasing Credit Supply to Agriculture, Rural areas and Farmers

With the gradual expansion in its network and the continued strengthening of its service capacity, the Bank provided active credit support to agriculture-related enterprises with its foundation of effective risk control.

The Jinan Branch provided two agricultural fertilizer enterprises - Weifang Aobao and Jinan Agri-Star New Fertilizer - RMB43.5 million in credit support and it increased credit to agricultural product processing company Linyi Jinluo by RMB120 million. As its number of branches increases, the Bank will gradually increase its investment in agriculture, positive responding to the government's preferential agricultural policies.

Given that Jilin is a major agricultural province in China with a higher proportion of primary industry than secondary and tertiary industries, the IB Changchun branch actively carry out cooperation with agricultural business enterprises in Jilin and in 2010, it provided a total of RMB533 million in credit support to agriculture and forestry enterprises in Jilin, including Jilin Grain Group, Jilin Forest Industry and Jilin Yuntianhua Agricultural Development, effectively supporting the development of agriculture and forestry in the province.

Working with Rural Banks to Serve Agriculture, Rural Areas and Farmers

The Bank actively responds to and supports reform of the rural financial system and strengthens division of labor with banks that it has stake holdings in. It supports the setting up of rural banks by these banks and makes use of such a platform and operating mode of these banks to support the development of urban banks through management and technical transfers, bank-to-bank cooperation, etc., and jointly promote the establishment of rural financial institutions.

In 2010, the Bank viewed the large number of rural banks as a focus for bank-to-bank platform efforts and launched the rural bank financial growth solution that set agent access payment systems, technology output, etc. as focus products for cooperation, which were popular with customers. As at the end of 2010, the Bank signed the cooperative agreements for the agent access payment system with 25 rural banks, among them, 15 rural banks including the Dongguan Changan Rural Bank are in the network; the Bank embarked on technology output cooperation with 7 rural banks that include the Zhejiang Longyou Rural Bank, and all of them have successfully joined the network.

The Road of Promoting Rural Area by Chengdu Branch

Using the innovative model of "contributions to poverty reduction + small loans to farmers + production assistance", the Chengdu Branch opened the "Road to IB" for local farmers that helped them out of poverty.

Turning "blood transfusion" into "hematopoiesis"

In Jinxing township, Dayi county in Sichuan province, the Chengdu Branch donated more than RMB200,000 to the construction of the "IB Elementary School of Hope" to solve the issue of insufficient schools for school-age children within a 10 km radius of the township. With donation for education as a starting point, the Chengdu Branch expanded the scope of its assistance and embarked on a "Project of Six", i.e. it seeks to build a hope elementary school, an IB avenue, an IB agricultural base, an IB health center, an IB nursing home and an IB library.

"Industry nurturing agriculture"

Realizing that the Road of promoting rural areas cannot be separated from the industrialization of agriculture, the Chengdu Branch established a collaborative relationship with Chengdu Modern Agriculture Guarantee Co., Ltd. and actively provides financial services to agribusinesses through the collaboration method of offering a guarantee platform. The Chengdu Branch has to date disbursed RMB200 million to modern agricultural enterprises in various places such as Dujiangyan and Niitsu, and has provided credit support in excess of RMB200 million to enterprises at the upstream and downstream of the agriculture industry, providing true financial support to local leading enterprises in the field of agricultural industrialization.

The "first pot of gold" for comprehensive improvement of land

As a national comprehensive reform pilot area for urban and rural areas, comprehensive treatment of rural land is a focus of the rural works in Chengdu. As such, the Chengdu Branch innovatively launched loans for rural land management projects, i.e. it disburses 3 to 5-year loans to land reserve centers or other qualified entities for use on the transformation of rural farmland, wasteland reclamation, reclamation of abandoned mining land, irrigation facilities, rural infrastructure and other comprehensive treatments. In February 2010, the Chengdu Branch successfully disbursed its first loan in support of the land remediation projects of the Jintang county land remediation center, for the amount of RMB300 million.

Supporting SMEs

Increasing Financial and Credit Support to SMEs

In 2010, with the overall scale of new credit limit subjected to strict regulatory supervision, the Bank focused on the lending needs of small enterprises. It specially arranged **RMB20 billion** of such loans for small enterprises in 2010 and implemented a system of supervision by specialists on loan uses so as to safeguard the needs of small enterprises. As at end of December 2010, the Bank's outstanding small business loans that meet national standards was **RMB358,183 million**, accounting for **60.94%** of all its business loans to enterprises, representing an increase of **30.43%** compared to the amount of **RMB83,569 million** at the beginning of the year.

The “Contract Signing Ceremony for Bank-Enterprise Cooperation cum Presentation of Financial Services for Growth Enterprises”

On November 11, 2010, the Hangzhou Jiaxing Branch held in conjunction with the Nanhu district government the “Contract Signing Ceremony for Bank-Enterprise Cooperation cum Presentation of Financial Services for Growth Enterprises”, signing with the representatives of 12 enterprises in the Nanhu district agreements for SME special credit loans, energy saving and emission reduction projects and investment banking cooperation, thereby supporting innovation enterprises, start-ups and growth SMEs with diversified financial services.

Improving the System of Managing Financial Services for SMEs

While increasing its support to SMEs in terms of financial services, the Bank fully promotes the establishment of small business franchisees, pushing for downward extension when establishing such franchise so as to establish a SME operating mechanism with the Bank's characteristics. As at December 2010, the Bank had established small business center and franchisee at **24** branches in the country, thereby implementing management systems, working mechanisms and operational procedures that allow its small enterprise business to be fully professionalized. It appointed its small enterprise business with a professional credit team that has more than a hundred members, fully reformed its credit process, enhanced its credit approval efficiency, gradually improved its incentive and constraint mechanism, established its mechanism for long-term professional training and ensured that its establishment of franchises is close to and meets the needs of small businesses.

Innovatively Launching Specialty Products – Making the Efforts to Break Through the Financing Bottleneck for SMEs

Launching the “IB Open Sesame” SME Growth IPO Program

Focusing on the different financing needs of its SME customers, the Bank broke the traditional limitations of credit settlement and introduced corporate finance, financial consultancy and other innovative investment banking services on the foundation of integrating a number of traditional credit and settlement operations, thereby launching the “IB Open Sesame” SME Growth IPO Program. At the same time, the Bank conducted in-depth studies of the financing needs of its small enterprise customers and officially launched many innovative products for small enterprises such as joint loans and joint guarantees, mortgages for self-built industrial buildings, mortgages for equipment and liquidity loan extensions.

The “Open Sesame” SME Growth IPO Program has three notable features.

1 It is the content-rich services.

With its advantage of having many years of serving SMEs and on the foundation of integrating many of its traditional credit and settlement operations, it introduced many innovative investment banking services such as corporate finance management and financial consultancy, helping SMEs resolve financing, settlement and management issues and supporting them in the enhancement of their overall management capabilities.

2 Its service programs are highly professional.

It creates on the basis of existing product application solutions a diverse portfolio of products and tailor-made service solutions for its customers, by looking at their stage of growth, the customer type, demand characteristics, etc. and through close coordination with its customer and product managers and professional services.

3 It offers one-stop solutions.

By accurately grasping the financial needs of SME Growth IPO, it offers a range of solutions and matches it with one-stop financial services so as to provide speedy and comprehensive solutions to the urgent needs of SMEs, allowing them to grow rapidly and healthily.

Embarking on Commodity Trading Financing Business

Taking into account the difficulties that SMEs in China faced in obtaining financing and the limited scope of financing that was available to them, the Bank embarked on the commodity trading financing business in 2010 by actively making use of its professional advantages and the products it offers include standard warehouse receipt pledge financing and precious metals pledge financing. Through the rational integration of its traditional loan business and the commodity trading market, it enriches the types of financial products offered, enhances its professional service capabilities, as well as solves the difficulties faced by SMEs that could not seek financing when their funds are tied down due to their holdings of standard warehouse receipts. It helps to accelerate the liquidity of these SMEs and promote their development.

After opening the way for the registration of standard warehouse receipts and the exercise of pledge at the Zhengzhou Commodity Exchange and the opening of special accounts for standard warehouse receipt pledge at the Shanghai Futures Exchange, the Bank opened the way for way for the registration of standard warehouse receipts and the exercise of pledge at the Dalian Commodity Exchange in 2010, making it the first commercial bank in China that can simultaneously handle all types of standard ware-house receipt collateral loan business at three Exchanges. Following that, it successfully launched its precious metals pledge financing business at the Shanghai Gold Exchange.

Returns to Shareholders

Rewarding Shareholders with Outstanding Results

Results of Operations

As of December 31, 2010, the Bank's total assets totaled RMB1,849,673 million, and its full-year accumulated profit after tax was RMB18,521 million, representing a year-on-year growth of RMB5,239 million or 39.44%. Earnings per share reached RMB3.28, representing a year-on-year growth of RMB0.78. At the same time, the Bank's corporate income tax and business tax totaled RMB8,139 million, up 13.43% over the previous year.

The Bank was named the Most Profitable Bank in Asia and ranked among the top ten Asian commercial banks in terms of overall competitiveness at the 21st Century Asian Financial Annual Conference cum Release of the 2010 Asian Banks Competitiveness Ranking Research Report jointly held by 21st Century Business Herald, 21st Century Institute Financial Research Center, the Chinese University of Hong Kong and a number of authoritative research institutes in 2010. In the previous rankings, the Bank was awarded the honorary title of "Best Cooperative Bank in Asia". Winning the 2010 "Most Profitable Bank in Asia" prize illustrates the Bank's strong development momentum and comprehensive competitive strength.

"Over the last four years, IB's weighted average return on net assets exceeded 24%. Whether in the midst of the financial crisis or riding the grand scheme for economic rejuvenation, its profitability maintained a high degree of stability," the judges said. The organizers thought highly of the Bank's sustainable profitability and spoke of "high capital return" as the impression that the Bank left on the market.

Successful Completion of Refinancing Through Share Allotment

The Bank announced the resolution of its Board on November 23, 2009, which stated that it had decided to raise core capital through a share allotment. After careful preparations, the Bank released the results of the allotment on June 1, 2010. The allotment was a success and the Bank shall continue to promote changes in its business and profit models and enhance its profitability and results. It shall also formulate a policy of stable cash dividends, maintain a strong ability to accumulate profits, supplement its capital through various channel in a scientific and rational manner, and repay shareholders with coordinated growth in endogenous capital and risk assets.

Active Communication to Enhance Investor Relationship

Fulfilling Information Disclosure Obligations and Helping Investors Gain a Better Understanding of the Bank

The Bank successfully completed the preparation and disclosure of four periodic reports in 2010, of which, it took the

initiative to explain popular topics such as real estate and the financing platform of local governments in its annual report to satisfy the needs of the investors for information and to enhance the readability of the annual report. It also disclosed all interim reports in full, in compliance with regulations and in a timely manner. It released a bulletin on its 2009 results in a timely manner to avoid volatility in its share prices due to any leaks in earnings results and to safeguard the equitable right of investors to have access to such information. It also initiated research on credit ratings and communicated with international rating agencies such as Standard & Poor, Fitch and Moody's so as to gain an understanding and improve the objectivity of its ratings.

Taking the Initiative to Communicate with Investors and Gain their Recognition

To strengthening communication with institutional investors and allow them to have an objective understanding of the Bank's investment value, the Bank convened **four** conferences that were tied to the release of its periodic report and **seven** conferences that included shareholder forums, press conferences, etc. It invited industry analysts and fund managers to conduct studies on the transformation of shantytowns and on cash management, capital operation, credit cards and other services, so as to communicate the Bank's business strategy of diversification. It conducted **41** one-to-one and one-to-many communications with institutional investors so as to enhance communication efficiency. For the whole year, it received more than **50** analysts in more than **20** visits. It participated in more than **30** conference calls with analysts and replied **160** letters. It sent by mail more than **20** sets of materials and answered more than **600** calls from investors at its hotline.

On March 3, 2010, Mr. Gao Jianping, Chairman of the Bank (first row, third from right) led the 2009 results presentation and communicated the investment value of the Bank objectively. They took in opinions and suggestions from investors on the Bank and maintain the image of the Bank in the capital market that is one of transparency and accountability.

As it has established good relationships with its investors, the Bank was named "Investors' Favorite Listed Company in China's Securities Market in the Past 20 Years" and "Listed Bank with the Greatest Investment Value in 2009" in 2010. It was ranked second in the "100 Top Listed A-Share Company in China in terms of Investors Relationship" twice and Mr. Gao Jianping, the Bank's Chairman, was named "Best Chairman", while Mr. Tang Bin, the Bank's Director and Board Secretary was named "Best Executor", "New Fortune Golden Board Secretary", etc. The Bank also received numerous awards, including "Social Responsibility Contribution Award" and "Innovations in Investor Relationship".

Coordinating Foreign Investors to Promote In-depth Cooperation

The Bank and the top levels of foreign investors exchanged more than **10** visits in 2010 and it greatly deepened mutual trust between the Bank and its foreign investors in various aspects such as supplementary capital, equity and business partnership, thereby promoting continuous deepening of business collaboration. The Bank also actively conducted exchanges and cooperation with Hang Seng Bank and IFC on gold trading on behalf of customers, financial management, trade financing, energy saving and emission reduction, Equator Principles, etc.

Sincere Customer Service

Improving Service Standards and Ensure Brand Quality

Improving Institution-building to Meet Customer Demands

To enhance the financial service capacity of its network of branches and effectively meet the demands of its business developments and customer service, the Bank had established 64 branches (consisting of 37 primary branches and 27 secondary branches) across 81 key economic cities in the country and 577 sub-branches as at end 2010. While expediting the establishment of new branches, the Bank also strengthened professional management and post-evaluation, established standardized management of regional financial market feasibility analysis, institutional planning, preparation, opening inspection, counseling, etc., and promoted the integration of new branches into the local economy as soon as possible.

Steadily Promoting the Construction of a New Generation of Core System and Supporting the Enhancement of Customer Service Standards

To enhance its integrated services capabilities that are customer-oriented, the Bank vigorously carried out upgrading of its core system and built more flexible and effective product configuration, parametric management and fees management module, thereby providing stronger support for transformation of its business development and profit models.

In June 2010, the Bank completed the antecedent project for the construction of its new generation of core system - new generation online support and trading platform migration, thereby enabling its core system to have greater stability, reliability, scalability and business processing capabilities. Research and development of its new generation of core system is progressing smoothly.

Improving Service Quality and Safeguarding Customer Rights and Interests

Embarking on Training Competition and Creating the Service Climate of Seeking to Be to First to Excel

To promote service team building and enhance professional training on service caliber, the Bank embarked on management of service supervisor, training of new lobby managers and teller service circuit training in 2010. Taking teller service circuit training for example, the Bank has conducted such training 97 times, covering the entire Bank and the total number of participants was 5,179, which is close to 100% of the total number of tellers in the Bank's network.

Training via completion, carrying out staff quality assessment and improving the quality of counter service staff and service capabilities. In 2010, the Bank conducted competitions on counter business skills and service specification, thereby creating a positive climate of service culture in the entire Bank and effectively enhancing its service standards. It also organized appraisals on star branches in terms of service and star service personnel, so as to elect outstanding branches and staff such as Star IB Branch in 2009 and IB Service Star 2009. The Bank also actively participated in related service appraisals conducted by the CBA. In 2010, 23 outlets of the Bank's 19 branches were chose as Good Models of Civilized Service in the Chinese Banking Industry. The Bank was awarded as the Financial Service Organization in the World Expo in China's Banking Industry by the CBA.

The Bank's service specification and etiquette contest 2010.

To fully reflect the human touch in its concern for its customers, the Shanghai Branch made detailed deployment to ensure obstruction-free financial service and improved the accessibility of its facilities to suit local conditions. It announced an obstruction-free phone service that is answered by specialists, thereby providing convenience for the disabled to smoothly conduct their transactions; it established a "five-in-one" multi-level obstruction-free language service system: foreign or special users can choose quality on-site service when they enter the Branch from specialists who speak English or uses sign language. The "Bank Multi-lingual Service Terminology" brochures are neatly displayed at the Branch and contact cards for World Expo volunteers who provide different language services can attend to guests from 12 different countries. During the World Expo period, this "five-in-one" service system served foreign guests from many countries such as UK, US, Germany, France, Saudi Arabia, Japan, South Korea and Kyrgyzstan.

Emphasizing on the Customer's Right to Know and Enhancing Service Quality

Ensuring the customers' right to know is an important means to safeguard their rights and interests, and to supervise and promote better service quality at the Bank. The Bank clearly and fully discloses its product risks to customers when marketing its wealth management products through the use of product manuals and sales agreement. It also demonstrates the best and worst possible returns of its wealth management products in different scenarios through the use of case studies. It also conducts customer risk assessments to ensure that "the suitable product is sold to suitable customers".

Before embarking on precious metals business, the Bank has already thought of how it should ensure the customers' right to know. It issued letters to all in the Bank on the various risks and ensured through the provision of training that all of its customer service centers and sales managers at its branches are fully aware of the risks of its various businesses, so that the customers' rights and benefits are protected at the point of marketing. Also, to satisfy the different investment needs of different customers, and ensure that they have a correct understanding of the features of innovative financial products and enhance their autonomy, the Bank conducted largescale business presentations in 2010. It held more than 100 large-scale investment presentations in the entire year, with more than 10,000 customers participating.

Timely and highly effective handling of customer complaints is an important part of protecting customer rights and interests and maintaining the Bank's reputation. As such, the Bank adopts an active approach in its handling of customer complaints and establishing an analysis and handling mechanism for customer complaints. Compared to 2009, the total number of customer complaints the Bank received in 2010 decreased by 48.75%.

Optimize Service Processes and Enhancing Service Capabilities

Reengineering its counter process was one of the important measures taken by the Bank to enhancing the overall service capacity of its business lobbies. Efforts to reengineer the counter process were officially launched in April 2010 throughout the Bank and by end of December, all branches had fully completed the job of promoting the reengineering of counter process and the efficiency of counter services at all outlets improved noticeably. Customer service improved significantly and this won the Bank much recognition and praise from its employees and customers.

Also, to accommodate its need for “changes in two models”, the Bank implemented reform of its lobby management model, strengthened lobby operations and management and marketing service organization and management, promoted the shift in its lobbies from the traditional “settlement at counters” to “sales service”, thereby enhancing the comprehensive service capacities of its lobbies.

Picture about the environment of the counter flow at Bank's Licheng branch in Jinan after reconstitution.

The Bank continued to improve its credit card services and created an overall service system for its credit cards, providing its platinum and gold card holders special rights and benefits. Internally, the Bank's credit card center set up a service quality oversight committee as well as a service quality office and appointed service quality supervisors for all departments to be in charge of service quality management, thereby ensuring that service quality improvement efforts are in place at all parts of the credit card service process and effectively safeguarding the increasing improvement in its credit card service quality from mechanisms and system. “To be customer-oriented” and continually improve on the service process, enhance service skills enhancement training and improve the customer experience by seeing customer complaints as opportunities.

Giving Full Play of the Advantages of Various Channels and Optimizing Channel Service Capabilities

Launching the Five-star Navigation System for Electronic Banking

In the course of business development, the Bank launched its e-banking service brand – “five-star navigation” based on the service philosophy of customer-orientation and according to the changes in customer demand for e-banking services under new circumstances. The “five-star navigation” consists of the “service platform star”, an integrated service platform; the “service team star”, a professional service team; the “service process star”, a set of standard service process; the “service commitment star”, a commitment of attentive service; and the “service security star”, assuring service security that allows the customer to have peace of mind from beginning to end. In so doing, the Bank created the brand image of e-banking with leading services in the industry.

Improving E-banking Functions

In 2010, as one of the 27 banks to become the first batch of banks to be linked to the People's Bank of China's interbank settlement system for online payment (super online banking system), the Bank rolled out in a timely manner services such as real-time inter-bank funds transfer through personal internet banking, inquiries on account information at other banks, signed certification gateway for account information inquiry, interbank credit card cash advance and interbank account management in enterprise network. The Bank added e-notes function that is interconnected with the e-commerce bank draft system of the People's Bank of China, providing the corporate e-banking customer of the Bank with e-notes services that meet the requirements of that system. As of December 31, 2010, the total number of valid e-banking customers was 3,001,500, an increase of 55.13% compared to early 2010; the total number of transactions was 68,389,500, up by 51.77% compared to 2009; total amount of transaction was RMB15.96 trillion, an increase of 36.92% compared to 2009; counter replacement rate through corporate e-banking transactions was 51.98% and that through personal e-banking was 52.70%.

Improving Phone Banking Service

The Bank successfully embarked on the expansion and optimization of its customer service system in 2010 as it further improved on the overall support capacity of its customer service system and transformed phone banking into a full-function integrated service platform that integrates business consulting and care, product marketing and trading, investment and wealth management, personal loan collection, VIP value-added services and other functions. As of December 31, 2010, it had a total of 6,057,200 valid phone banking customers, up 45.60% compared to early 2010; the total number of transactions in the year was 1,760,600, up 63.99% YoY; total transaction amount was RMB86,496 million, up 121.52% YoY; counter replacement rate through phone banking transactions was 1.82%.

Innovating Mobile Banking

With the launch of its mobile banking service "Wireless IB", the Bank became one of the few commercial banks in China to offer comprehensive mobile financial services capabilities. The Bank set up its mobile banking center in 2010 so as to accelerate its strategic development of its mobile banking business and enhance the standards of professional management of its mobile banking business. As of December 31, 2010, it has a total of 2,640,900 valid mobile banking customers, up 50.78% compared to early 2010; a total of 1,927,900 mobile banking transactions were conducted in the whole year, up 190.92% YoY; total transaction was RMB23,492 million, up 236.75% YoY; counter replacement rate through mobile banking transactions was 2.00%.

The four main functions of mobile phone banking

The Bank offers silver trading through its mobile banking service "Wireless IB", making it the first bank in the industry to offer gold and silver trading services via mobile banking;

The Bank offers "Mobile Phone Number Account Transfer" which has channel characteristics as well as real-time interbank transfer function in mobile banking, with the Mobile Phone Number Account Transfer allowing contracted customers to conduct account transfers with ease by entering the mobile phone number of the other party;

It further enriches its investment banking services under mobile banking and added mobile banking services such as convenient and intelligent deposit notification, electronic bonds and debt and equity financing;

It full realized customer identification and authentication based on the mobile phone number of any operator, and it supports services that require the use of linked mobile phone number, such as random account transfer using phone banking and mobile phone number account transfer, thereby enhancing the experience of the customer.

In 2010, the Bank's online banking service was awarded "the Best Online Banking Services", "the Best Mobile Banking Services" and "the Best Online Banking Functions in China" by Securities Times, Money Management Weekly and China Financial Certification Center, respectively. Its customer service center won the "Best Service Award" at the "2010 Award for Outstanding Customer Service Centers in the Banking Industry" sponsored by the CBA.

In 2010, a strategic partnership agreement signing ceremony was held jointly by the Bank and China Unicom. Mr. Li Renjie, President of the Bank (back row, seventh from the left), Mr. Chen Dekang (first row, first from the left) and Mr. Lin Zhangyi (back row, sixth from the left), Vice Presidents of the Bank, Mr. Lu Yimin, President of China Unicom and Mr. Jiang Zhengxin, Vice President of China Unicom attended this ceremony. This agreement will further strengthen the cooperation in areas such as basic telecom services, financial services, wireless Internet applications and sales/marketing. The two parties are working together to promote innovations that drive continuous improvement in the quality of mobile financial services (e.g. mobile payment, mobile banking, mobile commerce and other value-added services).

Strengthening the Channels Building of Automated Machines

As of the end of December 2010, the Bank had 4,140 automated machines operating nationwide, among which 2,178 were withdraw-only machines and 1,962 were full-function automated machines. At the same time, the transaction volume of automated machines continued to grow rapidly – in 2010, the Bank recorded 75.4 million ATM transactions (excluding account inquiries) through automated machines, with an increase of 30.33% YoY. The total transaction value reached RMB111.455 billion, jumping 27.65% YoY. The ATMs have become the third largest service channel for the Bank, following branches and online banking. In the mean time, automated machines have also become the largest channel for credit card repayment (accounting for 31.3% of the total transaction value), effectively relieving the branches' pressure and enhancing the Bank's efficiency.

Continuing to Push Financial Innovation by Designing and Promoting Sustainable Financial Products

Tailored "Xing Ye Tong" Solution for Growing Enterprises

In 2010, the Bank introduced the "Xing Ye Tong" solution, which was the first comprehensive financial solution in China tailor-designed for self-employed business owners, proprietary businesses, partnership companies and other private "growing enterprises". With corporate financing as its entry point, the solution covered a comprehensive set of financial solutions for growing enterprises, including loans, payment settlement, personal asset management and VIP services.

Mr. Chen Dekang, Vice President of the Bank (second from the left) launched the "EasyTrade" brand in Shenzhen.

Main services in the "Xing Ye Tong" solution

Loan services

Speedy loan application processing – approval is done within 5 working days and loans under the credit revolving arrangement can be issued within the same day; various forms of collateral – traditional collateral, pledges, joint guarantee, mutual guarantee, etc.; simplified application paperwork, together with long and revolving credit terms (up to 10 years) to help growing enterprises expand.

Payment settlement services

The comprehensive settlement network provides nationwide coverage and safe/efficient capital flow via 6 major channels (branches, automated machines, online banking, phone banking, mobile banking and interbank channels). Businesses receive timely payment settlement for their account receivables and when they use "Xing Ye Tong" cards, they will also enjoy special discounts for services such as payment, transfer and cash withdrawal.

Value-added services for VIPs

For black gold and platinum-level "Xing Ye Tong" customers, the Bank assigns "one-on-one" designated account managers and provides special window/service area at its branches. These customers also enjoy priority services and significant discount/waiver of transaction fees. To further enhance their quality of life, the Bank also provides certain value-added services, such as healthcare, airport lounges, free books and golf activities, etc.

Family-oriented asset management services

The Bank custom designs personalized financial plans for its customers. It also provides a variety of cash management tools and diversified investment channels to help customers maintain and grow their financial assets. It also provide protection-oriented products (e.g. life and accident insurance, etc.) to make customers focus on their business without other worries.

Special identity services

The Bank designs special "Xing Ye Tong" cards for its "Xing Ye Tong" customers as the platform to execute all of their transactions at the Bank. The black gold and platinum customers can also receive all VIP services by using their "Xing Ye Tong" cards.

Strategic value of the "Xing Ye Tong" business

The positioning of the "Xing Ye Tong" business is to help growth companies meet their financing challenges. It is consistent with the government policy of supporting the development of SMEs and private companies, and it serves to support the overall economic development.

The "Xing Ye Tong" solution incorporates "loan financing, payment settlement, personal asset management and VIP services" to strengthen the synergy among various business lines targeting the same customers via cross-selling and deepening client relationship by offering comprehensive services. The solution not only helps companies grow their business, but also enables them to establish a scientific financial plan.

From potential profitability perspectives, the size of the target customer group is extremely large and their demand for financial services is very strong. They are the "blue ocean" of the banking industry and targeting them will help optimize the Bank's business and client structure.

By the end of December 2010, the outstanding "Xing Ye Tong" personal loan for business operations reached **RMB26.271 billion**, an increase of **RMB19.666 billion** YoY. The Bank will continue to promote the sustainable growth of the "Xing Ye Tong" personal loan business and the Bank expects the total outstanding balance to exceed **RMB60 billion** by the end of 2011.

Well- received "Golden Cube" Cash Management Solution

To help companies improve capital management efficiency, lower financial cost and enhance management capabilities, in 2009, the Bank introduced the cash management service brand "Golden Cube" to design tailored and comprehensive cash management solution for companies, covering their capital operations, risk management, technical support and growth support needs. This service was timely in that many companies were having issues/challenges with their cash flow after the global financial crisis, and many of the Bank's customers were fast growing in size and business complexity (e.g. "4-crosses": cross-region, cross-industry, cross-ownership structure and cross-border). This service has since helped companies and their industries to achieve further development. The "Golden Cube" cash management solution successfully met companies' practical needs – it not only improved the company-bank relationship to promote sustainable economic and social development, but also created a "blue ocean" for the Bank to further enhance its core competitiveness. The solution is consistent with its principle of sustainable development by focusing on both economic profitability and social responsibility.

After over a year of promotion, the "Golden Cube" service has been well received by the Bank's customers. Thanks to the outstanding solution, the Bank won the "best cash management innovation award" at the 2010 CFO Magazine's "Most trustworthy bank in China" event. The success case of the Harbin Pharmaceutical Group also won the "best cash management case award" at the "2010 financial service rankings by banking institutions" event sponsored by www.zj198.com and supported by the China Banking Industry Association, CBRC and the Financial Research Institute of the China Academy of Social Sciences.

The cash management solution is both a product and a mutually beneficial cooperation model between banks and companies. It incorporates some products (e.g. some new interest rate calculation methods and new settlement tools (electronic settlement) to create a new market; in the mean time, it also leverages technology to create a new market, as it has close ties with IT and settlement technologies. Obviously, it also leverages services to create a market as it is a very high-end service. In summary, the cash management business is a comprehensive platform to upgrade banks' existing business models and achieve joint development between banks and companies – companies need the cash management service as they grow and the service in turn helps companies achieve better growth via stronger capabilities.

A SOE holding group has two listed companies and several wholly-owned, controlled or partially-owned subsidiaries. The over 100 entities in the Group generate over RMB10 billion annual revenue. However, the existing cash management system was not able to manage various subsidiaries in a tiered fashion, resulting in inaccurate information, inefficient budget monitoring/decision-making process, and low capital productivity at the Group level. To deal with the situation, the Bank setup a dedicated service team consisting of cash management experts from both HQs and local branches as well as IT support staffs to optimize the service plan design from multiple perspectives, such as cash management functional implementation and technology system hardware/software/operational support etc. The Bank provided a customized and comprehensive cash management solution using the "Golden Cube" product concept. After the new system was implemented, the Group's capital productivity was substantially improved (total savings reached RMB34 million). In the mean time, the Groups HQs and related settlement centers can have timely visibility into various subsidiaries' cash receipt/outlay activities, thereby enhancing capital and budget management capabilities.

Enhancing Customers' awareness of Sustainable Development

Advocating for "Green Finance" by Promoting Online Banking

The Bank advocated for "green finance, equator bank – helping you save paper, gas and other 'carbon trails' by using online banking and enjoying the 'colorful e life! ". The Bank used various means (point rewards, Q&A rewards and transaction rewards) to help customers save resources and increase their frequency of online banking.

Aggressively Promoting the Concept of Sustainable Finance

The Bank positioned "green finance and working together towards a beautiful life" as the central theme for its brand building campaigns. Through TV, published media and the Internet, it aggressively advocated and promoted the concept of green finance. In order to help the public better understand "green finance", it redesigned its ad campaigns to highlight "green finance" case studies of low-carbon credit cards and successful loans for emission reduction and energy conservation projects. Through these practices, it showed its commitment to energy conservation/emission reduction/sustainable finance and attracted the public to join the "low-carbon life".

- Joint project with www.sina.com to attract public attention to global warming issues, reaching over 27 million people;
- Sponsored the Low-Carbon Weekly published by the 21st Century Business Herald, which focuses on low-carbon economy and reaches over 10 million audience;
- Co-organized the "Second Pearl River Delta Business Leader Summit and the SME Service Day Green Economy Seminar", and introduced the Bank's green loan business to over 500 participating companies;
- Jointly organized the "Green Competitiveness Sales and Marketing Seminar" with www.sohu.com Green Channel and attracted over 10 million visits.

In May 2010, the Bank's Wulin Branch in Hangzhou organized a series of events promoting lowcarbon lifestyle in Hangzhou's Xia Cheng District. Through seminars, exhibitions, recycled product demos, broadcasting related video clips and organizing knowledge contests, the local awareness of lowcarbon lifestyle was significantly improved.

Pursuing Win-win through Partnership with Peers

Aggressive Development of the Interbank Platform to Promote the Sharing of Financial Resources

The "interbank platform" is another proactive initiative for the Bank to fulfill its social responsibilities. It is also a practical innovation to achieve its principle of sustainable finance. By integrating its internal resources, it provides a series of products and services to SME banks (city commercial banks, city and rural credit unions, rural commercial banks, rural cooperative banks, and town and village banks) to help them improve management capabilities, enrich product portfolio and enhance competitiveness to eventually become modernized institutions with sound management. This business model expands the interbank partnership channels in China, creates a new business line and model for Chinese commercial banks, and breaks through the "bottleneck" of homogenized competition by creating differentiated financial products. In the mean time, through the "interbank platform", the Bank further deepened the cooperative relationship with SME banks and redefined the banking industry's value chain - by jointly taking on social responsibilities with both upstream and downstream companies and building a win-win cooperation mechanism. Through consensus strategies and consistent standards, all the participants along the value chain can work together to build a value network of social responsibilities.

In 2010, for the "interbank platform", the Bank further expanded the customer base, enlarged the network coverage, and improved the agent payment settlement capabilities and customer service quality. It signed comprehensive strategic partnership agreement with Evergrowing Bank (including branch interchange and VIP portal cooperation agreement), which was the first commercial bank with national license to join the "interbank platform". With a number of regional banks joining the platform (e.g. Bank of Chongqing, Bank of Wenzhou, Bank of Hankou, Bank of Longjiang, etc.), its level of partners and market influence have been significantly enhanced.

The Bank continued to invest in product innovation for the interbank platform – it accelerated the development of the payment settlement platform and the VIP portal product. In 2010, it also introduced the client side software for town and village commercial banks. Several other products (e.g. precious metal agent trading system, new-model third-party deposit management, etc.) also became operational, sustaining the innovation and market leadership of the platform. In 2010, it completed the IT system implementation for 1 city commercial bank and 6 town and village commercial banks. As of now, 16 banks are on the platform and several important R&D and implementation projects have been completed. The main focus of the operations and maintenance of the platform is on risk assessment and management. The system has been

running stably – all participating banks have had over 99.998% availability in their core systems. As SME banks lack branch resources, the Bank has established partnership with over 50 SME banks through its "branch interchange" program, linking over 12,000 branches nationwide and effectively solving their customers' problems of non-local deposits and withdrawals, and thereby helping SME banks expand their national reach.

In October 2010, the Bank organized the "2010 Interbank Platform Cooperation Forum and the Strategy Seminar for Sustainable Development of Chinese Commercial Banks". Surrounding the theme of commercial banks' sustainable development, the event allowed participants to share their experiments and experiences in building sustainable finance as well as to analyze the environment and trend of the commercial banking industry in the post-financial crisis era so as to promote the sustainable development of China's banking industry. Participants also discussed how to leverage the Bank's practices and experiences with the "interbank platform" to strengthen interbank business integration and resource/channel sharing.

The "Interbank Platform" is not an exclusive platform for the Bank only. On the contrary, it is an open platform that is jointly developed, owned and shared by all partners to pursue win-win. Participating banks can leverage each other's strengths and avoid homogenized competition with each other. The platform will help build a sustainable financial ecosystem in which players co-exist in a harmonious manner.

Deepening Interbank Cooperation and Conveying the Meaning of Sustainable Development

Bank-securities Cooperation

The Bank actively cooperated with regulators and settlement entities and partnered with securities companies to pursue process improvement and service innovations. It participated in the development of the capital monitoring system for securities markets' trading settlement; it led the securities industry conference to discuss the development of the bank-securities cooperation business; it partnered with securities companies to discuss value-added services such as non-trading money transfers under third-party deposit management, account-opening by appointment, etc. It also added the service to transfer funds between bank and securities accounts via mobile phone. In 2010, it was one of the first banks to introduce the deposit management service for stock shorting and margin financing transactions, and as of now, it has established deposit management business relationship with all the 11 securities companies that were in the first two batches to receive the license from CSRC.

Bank-trust Cooperation

To comply with regulators' requirement to strengthen the guidance and management of real estate-related trust business and market entry, the Bank further normalized its trust capital receipt and payment business, optimized interbank asset management business approval and management system, and implemented the market entry requirement for trust companies. In 2010, its revenue from trust asset management business totaled RMB184.371 billion, with cumulative trust capital receipt/payment reaching RMB3.134 billion and total managed trust asset reaching RMB111.682 billion. In terms of asset management product design, it specifically focused on the sustainable nature of the underlying assets to fulfill its social responsibilities.

Yunnan Railway Investment Trust asset management project at Kunming Branch

In 2010, the Bank worked with Yunnan Railway Investment Co. Ltd. to design a trust asset management product, with a total of RMB500 million funds raised. Through this partnership, on one hand, the railway construction in Yunnan Province was accelerated to speed up the railway technology equipment modernization process and promote the healthy economic and social growth in that region; on the other hand, the Bank built a good working relationship with Yunnan Railway Investment Co., laying the foundation for the two companies to build a sustainable partnership to achieve "win-win" in the future.

Bank-financial Company Cooperation

The Bank continued to deepen the "cash management" brand and solutions for financial companies. To meet customers' differentiated demand, it focused on building personalized services with customized products.

China Power Finance Co. IPO subscription trust project

According to China Power Finance Co.'s capital management requirement, the Bank designed a personalized solution with customized services by introducing an offline IPO subscription trust product. This product helped the customer gain returns on the capital that has long been idle, and it was well received by the customer. In January-November 2010, the total IPO subscription value reached **RMB47.9 billion** in **232** transactions.

Being Committed to Livelihood Finance

Enhancing Support for Livelihood Projects

Actively Promoting the Social Security Card Project and Fully Supporting the West Bank of the Strait Livelihood Projects

In 2010, the Bank officially launched the social security card in Fujian Province – the first standard social security card approved by the Ministry of Human Resources and Social Security and the PBOC. The card not only integrates multiple functions (healthcare, medical insurance, banking, etc.), but also supports centralized payment settlement via the e-wallet function, which is very convenient for card holders. The card also lays the foundation to build residents' health information system for Fujian Province. At this point, the Bank has secured the card issuance rights at the provincial level and the regional level in three regions (Ningde, Zhangzhou and Sanming), and the total number of outstanding cards has reached almost **200,000**.

In the picture, Mr. Li Renjie, President of the Bank (second from the left), attended the launching ceremony of the social security card of Fujian province.

Fulfilling its Social Responsibilities and Receiving Compliments by Timely Paying the Compensation for Urban Villages' Relocation

To better handle the financial aspects of the urban villages' relocation project in Kunming, the Kunming Branch set up a dedicated financial services team and formulated a detailed service plan – "Home building financial service plan" – to fully support the relocation project via clear allocation of responsibilities and optimized service process. By the end of December 2010, over 1,600 families received compensation payment from the Kunming Branch, totaling RMB440 million. The Bank's speed and efficiency were highly praised by the government and relocating families. During the payment process, the Bank put itself in customers' shoes and leveraged its strong value-added services to help the relocating families (e.g. money transfer fee waivers, green channel for medical reimbursement, making appointment with medical experts, free physical check-up, etc.).

The Dalian Branch allocated RMB400 million to support the welfare housing project at the site that used to be Heilongjiang Food and Oil Group's warehouse in Qianguan Village of Dalianwan Town in Ganjingzi District. Upon completion, the project will provide nearly 5,000 units of welfare housing to effectively alleviate the demand pressure from low-income families in the Dalian area.

Receiving Widespread Compliments by Providing Strong Support of the Endangered Housing Reconstruction Project in Harbin

In 2010, the Harbin Branch continued to strongly support social welfare projects by providing RMB3.76 billion loans to various endangered housing reconstruction projects. The loans also brought stable and continued growth in the Branch's asset base and loan business. In addition, 14,000 families/189 companies in 27 reconstruction projects received a total of RMB1.2 billion/RMB1.96 billion relocation compensation from the Bank, respectively (total sum reached RMB3.16 billion). The Harbin government wrote letters to the Bank's headquarters, expressing their sincere gratitude for its strong support to the city's development.

Shantytown before redevelopment

Shantytown after redevelopment

Starting the "Red Rose Program" to Support Female Entrepreneurs

In 2010, the Taiyuan Branch worked with Shanxi Provincial Women's Federation, Shanxi SME Credit Guarantee Co. and various city-level government-backed credit guarantee entities to launch the comprehensive, professional and convenient financial service programs to provide financing to companies founded by female entrepreneurs. The programs help these SMEs win by being "professional, focused, differentiated and innovative". The programs are based upon the Bank's products in the "Golden Sesame" series, in the energy conservation/emission reduction projects, as well as trade financing and other products. The programs are targeting to issue over **RMB2 billion** loans in the next 5 years, to help grow **10** SME companies into large companies (with 1-2 reaching IPO standards). The programs will also support **100** service-oriented companies and create **20,000** new jobs. A new win-win model among governments, banks and enterprises will be created should the programs become successful.

Aggressively Promoting Loans to Poor and Disadvantaged Groups

To meet the employment/startup financing challenges faced by unemployed population, the Bank aggressively promoted its guaranteed microloan business to the unemployed to build a platform for them to find new jobs or start a business. In 2010, it issued **715** micro loans totaling **RMB55.605 million**.

In 2010, the Sanming Branch issued **RMB52.96 million** guaranteed micro loans to support 662 unemployed entrepreneurs to start new businesses. Through one-stop-shop comprehensive financial services, it created over **RMB5million** economic benefits and healthy social benefits. In the mean time, over **220** micro-loan accounts are linked with "Xing Ye Tong" card, further extending its service outlets to these customers. In addition, the Sanming Branch also issued **RMB3,311.3** thousand student loans to support **787** students from low-income families to finish their college education.

Environmentally Friendly Efforts

- © Comprehensive Promoting Green Credit
- © Unremitting Exploration of Green Operations

Comprehensive Promoting Green Credit

"Actively develop green credit, support a low-carbon economy" was selected as one of 10 major items within the Banking industry in 2009, adjustments to the credit structure will play an important role in the adjustments to the entire economic structure.

China's Green Credit Policy

Green credit refers to a series of policies, institutional arrangements and practices in which credit means are utilized to advocate environmental protection and emission reduction, this usually includes three core content types:

The first is the use of appropriate credit policies and means (including loan types, periods, interest rates and amounts) to support environmental protection and energy conservation projects or enterprises;

The second is to enforce credit penalties such credit freeze, credit slowdown and even the recovery of loans against projects or enterprises that violate laws and regulations relating to environmental protection and energy conservation;

The third is the use of credit means by lenders to guide and advocate environmental risk prevention among borrowers, thus performing their social responsibility and reducing credit risk.

——Cited from the "2010 China Green Credit Development Report" prepared by the Policy Research Center for Environment and Economy

The severe environmental situation that the country is currently facing shows that the emission reduction means of a few specialized departments will be of limited effect, and thus requires more macroeconomics departments to linked up to carry out system innovation. Outside of simple administrative means, "Green credit" is an "economic lever" upon which great expectations are placed. Its objective is to force enterprises into internalizing their pollution costs through economic means, thus realizing the effect of replacing remedial actions with voluntary pollution reduction. Realizing "green credit" is an important step in supporting the state's economic development plan, cooperating with the state's realization of the "high-pollution, high-energy-consuming and resource dependent" industries policy, promoting the realization of energy conservation and emission reduction, building an environmentally friendly image and resource conservation-type society, they are effective guarantees to a commercial bank's strengthening of its environmental and social risk management, and are the commercial bank's social responsibilities.

Industrial Bank's Broad Participation in Green Credit Practices and Exploration

The Bank has always believed that its participation in "green credit" and the development of sustainable financials will promote the realization of the state's sustainable development strategy for the economy and society on one hand, and on the other hand, it will encourage banks to pay more attention to long-term interests instead of short-term interests, which will unite self-development objectives with social objectives, and at the same time, promote the raising of sustainable development motivation and capability by enterprises through financial leverage, and ultimately realize banking, enterprise and social value, this is the Bank's core philosophy for its sustainable development strategy.

With this in mind, the Bank is actively responding to national policies, drawing on credit advantages, strictly controlling the scale of loans to high-pollution and high-energy-consuming industries, adjusting its loan structure, conscientiously implementing industrial policy and market entry standards for projects newly started by high-pollution and high-energy-consuming industries, and refusing credit to those which do not comply with environmental standards. As of December 31 2010, the Bank's total loan balance for high-pollution and high-energy-consuming industries is [RMB49.206 billion](#) with a non-performing loan ratio of [0.88%](#), compared to the end of 2009, the total balance declined by [RMB1.124 billion](#), the proportion of such loans among the Bank's corporate loans was reduced by [2.24%](#), and the non-performing loan ratio fell by [0.28](#) percentage points.

At the same time, the Bank has formulated strict internal credit business entry standards, through the strengthening of analysis and research on backward production capacity within industries such as power, coal, coke, iron alloy,

steel, non-ferrous metals and calcium carbide, and strictly rejecting loans for enterprises with backward production capacity. In 2010, the Bank rejected **RMB5.723 billion** in loans and **42** loan applicants due to backward production capacity. As of the end of 2010, the non-performing loan ratio for backward production capacity enterprises is **0.49%**.

Additionally, through further exploration of green business models and business process reengineering, the Bank has enriched and reinforced its green financial content. Currently, the Bank has gradually inculcated the "green credit" innovation philosophy into the entire bank's various relevant management and business lines.

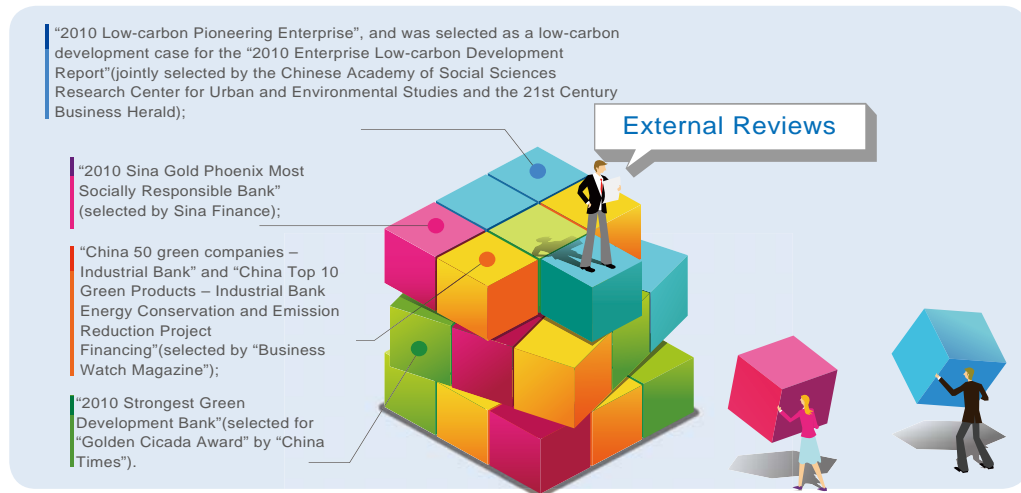

Energy Conservation and Emission Reduction Project Loans Achieving Excellent Performance Again

In 2010, the Bank's energy conservation and emission reduction business became a key credit focus, with energy conservation and emission reduction businesses clearly being given priority support by the "Industrial Bank Annual Credit Business Entry Rules". Within the green financial service field, the Bank continues to focus on specialized teams, focused research, professional service, the gradual realization of the development of the entire process and wide-ranging fields, thus forming two major product series which are the energy conservation and emission reduction financing services and emission rights financing services, which will accumulate valuable experience for the localizing of the green financial service field. The Bank launched "8+1" types of financing service models, and specially tailored financial services for each carbon trading phase. Energy conservation "8+1" financing services include: energy conservation and emission reduction technological transformation project financing model, financing models under CDM, EMC financing model, energy conservation and emission reduction equipment supplier/buyer credit financing model, energy conservation and emission reduction equipment manufacturer production expansion financing model, public utilities service providers financing model, financial lease model, emission rights pledge financing model and diversified financing model. Currently, the Bank's is already offering green credit services at all branches, with projects spanning the major economic regions including the Yangtze River Delta, Pearl River Delta, Bohai Sea, the Northeast region, the Central region, the Western region and Haixi: six major fields are involved which include energy efficiency, new energy and renewable energy development and utilization, carbon emission reduction, sewage and water treatment, sulphur dioxide emissions and solid waste recycling, thus covering the "10 major energy conservation projects".

- As of the end of December 2010 (since January 2007), the Bank has granted and accumulated **1,012** energy conservation and emission reduction loans amounting to **RMB47.868 billion**. Of these, **789** energy conservation and emission reduction loans amounting to **RMB31.285 billion** were newly granted in 2010.
- It is hoped that the energy conservation and emission reduction projects supported by the Bank will realize within China: an annual saving of **18.7141 million tonnes** in standard coal every year, an annual emission reduction of **51.6508 million tonnes** of carbon dioxide, an annual emission reduction of **768,400 tonnes** of COD (Chemical Oxygen Demand), an annual emission reduction of **20,100 tonnes** of sulphur dioxide, an annual **6.7376 million tonnes** in comprehensive utilization of solid waste, and an annual **43.891 million tonnes** in water conserved.

- As of the end of December 2010, the Bank invested and accumulated **RMB13.637 billion** into the water environmental industry. In 2010, new investments amounted to **RMB7.111 billion**, a YoY growth of **109%**, these include the state's key water treatment areas: Taihu Lake Basin, **RMB4.63 billion**; Yellow River Basin, **RMB1.82 billion**; Chaohu Lake Basin, **RMB1.6 billion**; Yangtze River Basin, **RMB959 million**; Pearl River Basin, **RMB922 million**.
- As of December 31 2010, the Bank provided financing support with a loan balance amounting to **RMB11.911 billion**, covering renewable energy projects in areas such as wind energy, solar energy, geothermal energy, hydropower, biogas and biomass energy utilization.

Energy conservation and emission reduction financing assistance for technological upgrading by enterprises – Yunnan Kunming Steel Coking Co., Ltd. Energy Conservation Technological Transformation Project

Basic description of project

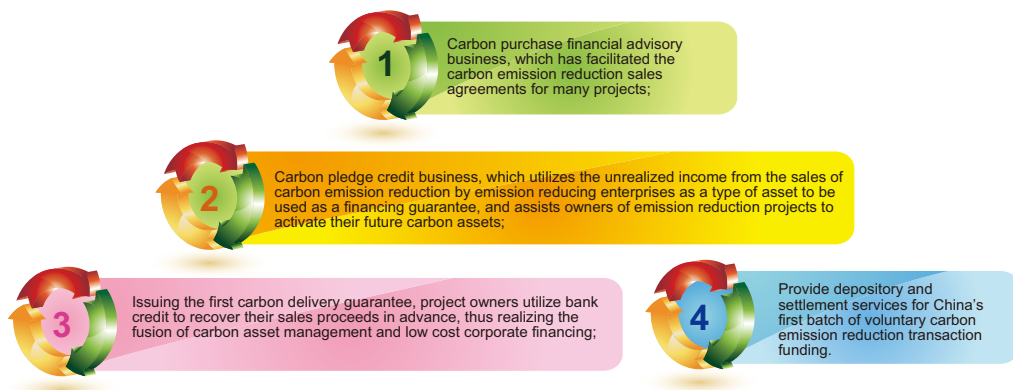

- Yunnan Kunming Steel Coking Co., Ltd was established in December 2007, it is a wholly-owned subsidiary of Kunming Iron and Steel Holdings Limited, and has excellent qualifications and is well-positioned in the industry. The energy conservation technological transformation financing provided by the Bank was used to carry out an energy conservation coke quenching technological transformation project for four coke ovens belonging to its subsidiary, Yunnan Kunming Steel Coking Co., Ltd.

Environmental and social benefits of the project

- Environmental benefits: the project uses coke dry quenching to recover heat from red coke, obtaining **326,400 tonnes/year** of 1.0MPa medium pressure steam, annual power generation of **110429×10³kWh**, **50,850 tonnes** of standard coal in annual energy recovery. This is equivalent to a reduction of **38.5kg** of standard coal per tonne of coke production capacity, effectively reducing the enterprise's production cost and raising its market competitiveness. The project also reduced harmful phenol-cyanogen substances and dust, which are released into the atmosphere through the use of coke wet quenching, by about **60%**. At the same time, as coke dry quenching equipment recovers the sensible heat from red hot coke, steam for power generation is produced, replacing the coal-fired boilers of corresponding scale, and thereby reducing environmental effects of soot emissions such as coal-fired boiler ash, sulfur dioxide, nitrogen oxide, and bringing significant environmental benefits.
- Social benefits: With the support of energy conservation and emission reduction financing, Yunnan Kunming Steel Coking Co., Ltd successfully implemented energy conservation and emission reduction technological transformation, which not only generated excellent economic benefits, but also significant environmental benefits from allowing the enterprise to raise energy efficiency and reduce pollutant emission; furthermore, by allowing the enterprise to raise its production efficiency and further consolidate its leading position in the province's coking market, sustainable development competitiveness is thus achieved.

Integrated Carbon Financing Services

The Bank's integrated carbon financing services include:

Retail Business—Status of Low Carbon Credit Card Promotion

In 2010, to advocate “green, low carbon” concept, and to encourage credit card customers to actively participate in green consumption and enjoy “low carbon” lives, the Bank issued the first domestic low-carbon-themed card—the China Low Carbon Credit Card. The low carbon credit card gained a high degree of recognition from the market and customers upon its introduction in the market, it achieved great results and was widely popular and praised; it not only strengthened the Industrial Bank Credit Card’s “live by your interests” brand concept, but also greatly raised the visibility and reputation of the Industrial Bank Credit Card. As of the end of 2010, the card issuance volume has exceeded 110,000 cards, accumulating more than 20,000 tonnes in the purchase of carbon emission reduction, which was equivalent to the carbon footprint created by having 143,000 people travel 1000km by plane, effectively promoting the popularization and spread of the “environmental protection, low carbon” concept.

On October 26 2010, during the “2010 China Brand Value Management Forum” cum “6th China's Best Brand Building Case” awards ceremony jointly organized by the 21st Century Business Herald and Interbrand, the world's largest integrated brand consulting company, the Bank's Industrial Bank Credit Card received the “China's Best Brand Building Case” contribution award.

The panel felt that the “Industrial Bank China Low Carbon Credit Card” was aspirational, possesses unique functions, suited mainstream values and hotspots in the current society, brought out the credit card's personal financial carrier role, ushered the “green, environment protection, low carbon” concept into people's lives, and concurrently providing an integrated personal consumption carbon purchase platform for customers and becoming a realistic and effective channel for individuals to involve themselves in the low carbon field.

Wealth Management Services

- With respect to wealth management trust products for the real estate industry, the Bank strictly requires developers to utilize their funds in a proper manner, disallowing them from engaging in actions that are strictly prohibited by the state (such as land hoarding), and having the sustainable development of real estate and the Bank's wealth management business's sustainable development as the primary starting point for the Bank's product development, thus paying attention to man's harmonious relationship with nature, environment and society while profits are being earned.
- With respect to financial trust products targeted at the big five power companies' financial claims, especially for wind energy projects, the Bank has fully considered its responsibilities as an "Equator Principles Financial Institution" during product development, and assists the sustainable development of the power industry through sufficient communication with the big five power companies; at the same time, the Bank promotes the sustainable development philosophy to the public through retail wealth management products.
- With respect to financial trust products for the iron & steel industry, the Bank clearly requires in the fund usage agreement with iron & steel enterprises that part of the fund is to be used for energy conservation and emission reduction.

Financial Leasing Services

As a business with characteristic advantages, energy conservation and emission reduction is concurrently a special business field that the Bank's wholly-owned subsidiary—Industrial Bank Financial Leasing Co., Ltd (hereinafter referred to as "Industrial Bank Leasing") is focusing its expansion on. Industrial Bank Leasing is making great efforts to expand the energy conservation and emissions reduction business, starting a series of businesses in industries such as waterworks hydropower and iron & steel, actively expanding EMC companies and manufacturers of equipment relating to energy conservation and emissions reduction, and exploring cooperative models with EMC companies.

Within two months of its establishment, Industrial Bank Leasing invested in 6 energy conservation and emission reduction projects, investing a total of RMB3.1 billion, accounting for 31.12% of the total amount invested. These projects involve areas such as wastewater treatment, elimination of backward production capacity and environmental governance, thereby achieving the preliminary establishment of a green leasing company brand on the market. During its business expansion, Industrial Bank Leasing even designed and completed a standardized business model and product solution specifically directed at the wastewater treatment field, laying a better business foundation for the next step in the expansion of the energy conservation and emission reduction business.

Innovative green credit in financial leasing – project by a certain iron & steel enterprise's to eliminate backward production capacity

Basic description of project

A certain large private iron & steel enterprise had a design capacity of 6 million tonnes. Currently, the enterprise is engaging in a site relocation project to eliminate backward production capacity, the project is able to effectively reduce its energy consumption indicators through the selection of 2,350 cubic meter blast furnaces and related energy conservation equipment, compared to 450 cubic meter blast furnaces, the 2,350 cubic meter blast furnaces' utilization coefficient is higher by 14%.

Financial service solution and characteristics

This transaction adopted the direct financing lease transaction structure, for which the 2,350 cubic meter blast furnace (includes TRT power generation equipment), part of the equipment for the sintering machines supporting the furnaces, and sintering heat power generation equipment that the lessee is intending to purchase will be the assets for leasing, with the leasing period being five years. During the leasing grace period, the lessee will only be required to pay the leasing interest each quarter, and does not return the lease principal, after the grace period expires, the rental shall be paid according to the principal and interest, after the leasing period has ended, the rights to the leased assets will be transferred to the lessee at the nominal price of RMB10,000.

Through the abovementioned leasing transaction, the lessee is able to utilize the leased equipment and eliminate backward production capacity, achieving the objective of energy conservation through the financial leasing model and innovating the green credit business model.

Implementing the Equator Principles——Guiding Borrowers to Raise Environmental and Social Performance

On October 31 2008, the Bank became the first Chinese bank in China to announce the adoption of the Equator Principles. Led by the Board and senior management, and through more than two years of exploration and practice, the Bank has basically completed reengineering for the organization, process and capability in the implementation of the Equator Principles. In 2010, upon the foundation of the experience previously garnered, and in accordance with the work execution status at the headquarter and branches, the Bank continued to improve its process, raise its efficiency, promote the implementation and realization of the Equator Principles, effectively controlling the project financing environment and social risks, and upon this foundation, the Bank will gradually refine and expand the concept and practice of sustainable finance. For specific projects, the Bank shall, utilizing the implementation of the Equator Principles as an opportunity, actively employ credit means to guide and encourage borrowers to raise their environmental and social performance management capability, prevent risk and perform their social responsibilities.

On one hand, the Bank provides environmental and social risk management guidance for projects to borrowers through extensive applicability review for the Equator Principles, thus raising the borrowers' cultivation and capability in terms of sustainable development awareness. As of the end of December 31, 2010, the Bank carried out Equator Principles applicability reviews on 577 loans, which accounted for a total investment of nearly RMB600 billion.

On the other hand, with respect to financing projects that the Bank has recognized the Equator Principles to be applicable on, the Bank has provided sustainable financial services with environmental and social risk management at its core for the entire project cycle, including phases such as the early stage project review, environmental and social risk due diligence, review and postloan management, thus forming a three-level linkage mechanism for the headquarter and branches, with active participation in project reviews, strengthening of communications with borrowers with regard to buildup of their projects' environmental and social performance and internal management mechanisms, thus elevating the borrowers' sustainable development awareness and capability through "actual groundwork". As of December 31 2010, the Bank has recognized 75 projects that the Equator Principles will be applicable on, accounting for a total investment of RMB99.365 billion and 74 customers. (For the specific circumstances and relevant cases pertaining to the implementation of the Equator Principles, please refer to the Bank's "Practice chapter".)

Unremitting Exploration of Green Operations

As an Equator Principles Financial Institution in China, the Bank has always focused on ecological and environmental protection issues that crop up in the business development process, and persists in inculcating the sustainable finance philosophy to each and every field and chain in the management.

Under the guidance of the "Report by CBRC on specific measures for the implementation of the [Comprehensive Working Program on Energy Saving and Emission Reduction]"(CBRC[2007]No.342), and in accordance with the internal environmental management regulatory requirements in the Bank's "Environmental and Social Risk Management Policy", the Bank will continue to strengthen its energy conservation and green adoption work, strictly adhering to and executing the government's procurement system, fostering the concept of legally-compliant procurement, properly executing energy conservation and green procurement work, and under the conditions of equivalent function, technology and service, giving procurement priority to new products under the government's procurement list for products with environmental labels.

Strengthen Awareness Management Supplemented with Technological Support

Based on the essential requirements for its sustainable development philosophy, the Bank is practicing the active and effective promotion and implementation of the "Office Energy Conservation Management Practices", beginning with the finer details and constantly strengthening its staff members' energy conservation awareness through various methods including system management, energy consumption settings, reminders, printing of low carbon office handbook and promotional posters, thus cultivating a health and energy-saving working and living habits.

Refining Day-to-day Energy Consumption Management

During the summer season, the temperature of air conditioners at each department is required to be set at no less than 26°C, and during the winter season, the temperature of the heating systems at each department is required to be set at more than 20°C; in offices, meeting rooms and other office areas, air conditioning are not to be switched on when nobody is around, curtains are not to be opened when the air conditioning is switched, and air conditioning may only be switched 30 minutes prior to a meeting.

Reducing Office Expenses

Improve electronic work processes and promote a paperless office; promote double-sided printing, and encourage use of recycled paper; replace original consumables with general consumables.

Standardized Management of Green Operations

Strictly execute office supplies management, incorporate energy conservation and emission reduction, green conservation, suppliers' environmental and social performance and the national energy conservation certification into the procurement assessment criteria for equipment and office supplies, and apply them during actual procurement.

In the renovation of the Bank's headquarter building and the construction of its Zhangjiang Operations Center, the Bank strictly enforced the green operations standardized assessment and selection, ensuring energy conservation, environmental protection and green operations.

Advocating Low Carbon Travel

Further strengthen the management of vehicles for official use, cultivate good fuel conservation and emission reduction habits in driver; carry out periodic maintenance for utility vehicles, ensure vehicles are in peak condition, reduce fuel wastage; promote the use of public transport, bicycles or walking as commuting means, thus putting an end to private use of vehicles.

Result Highlights of Energy Conservation Reform

Headquarter Building Energy Conservation Reform

In 2010, the Bank organized the headquarters building advertisement reform work; using advanced energy conservation technology and energy-saving lighting, the electricity system saved 13,000 kwh electricity and reduced its electricity charges by 36% and carbon dioxide emission was reduced by 102.05 tonnes.

Headquarter Building Energy Conservation Reform

Diagram of the head office building after reconstruction for energy conservation

Significant Energy Savings from Lighting Change

A sub-branch in Chengdu switched from traditional lighting to LED energy-saving lighting, and statistics showed that, compared to traditional light sources, the new light sources reduced energy usage by 60%-70%, which meant a total savings of RMB203,237 in electricity charges over three years and the recovery of the lighting costs within one year or so. Based on 0.785kg of carbon emitted per unit of electricity and a three-year energy saving of 127,023, the three-year carbon reduction volume would be 99,713 kg.

Special Activities—"Earth Hour" Community Environmental Protection Activity

中国首家赤道银行——兴业银行邀您共同参与 **地球一小时** 活动。与我们一起在 **3月27日 20:30 至 21:30** 熄灯一小时。为了地球母亲更好的明天，支持节能减排，倡导低碳生活！

兴业银行邀您参与“地球一小时”活动 倡导低碳新生活

目前，气候变化已成为全球面临的重大挑战，每个企业和个人都应该积极地行动起来，减少温室气体排放，遏制全球变暖，拯救人类共同的家园。

世界自然基金会（WWF）所发起的“地球一小时”活动通过熄灯这一简单而直接的方式，凝聚全球民众节约使用能源，关注气候变化，保护我们赖以生存的环境。“地球一小时”活动的想法最初诞生于2007年的悉尼，支持气候变化行动的人们聚集在一起关灯一小时，表达他们对应对气候变化的支持。共有250万悉尼居民参与了当年的“地球一小时”活动。此后，“地球一小时”活动以惊人的速度席卷全球。2008年，全世界有180多个国家和地区，400多个城市，超过10亿人参加了“地球一小时”活动，成为史上最大型应对气候变化的公众活动。

2010年的“地球一小时”活动将于3月27日晚举行。作为中国首家赤道银行，兴业银行将支持和参与2010年的“地球一小时”活动，用实际行动倡导可持续发展的理念。兴业银行也将号召所有热爱环境、支持低碳的企业和个人共同参与本次活动。让我们一起在 3月27日的 20:30 至 21:30 熄灯一小时，为了地球母亲更好的明天，支持节能减排，倡导低碳生活！

兴业银行
INDUSTRIAL BANK OF CHINA, LTD.
真诚服务 相伴成长

服务热线：95561 客服热线：www.cib.com.cn 无锡兴业：wuxi.cib.com.cn

On March 27 2010 20:30, the Bank's headquarters, more than 500 operators across the country, and more than 20,000 staff members partook in the “Earth Hour” community environmental protection activity, all building logo billboards, office lighting and publicity billboards were switched off at the same time, through simple and direct “lights out”, the Bank shows its support for energy conservation, emission reduction and a low carbon lifestyle.

At the same time, from March 22, the Bank initiated a series of promotional activities, including the issuing of the "Earth Hour" activity proposal within the Bank, and the addition of "Earth Hour" activity information and logo on the Bank's print, TV and internet media advertisements, and sending E-mails and SMSs about the "Earth Hour" activity to the Bank's online banking, credit card and VIP customers. The Bank's President, Li Renjie even launched a special "Reach out our hands and protect our home" video initiative. This video was played at the Bank's branch network points, the NetEase website and the QQ website, and created a great impact.

External Review

"Industrial Bank persists in inculcating the sustainable development philosophy into each area of its business management, and its exploration of sustainable finance has gradually extended from energy conservation and emission reduction loans to fields such as green credit, environmental and social risk management and low carbon products; it has always been developing its financing business in a manner which benefits the environment and society, while emphasizing economic efficiency and growth, it is also effectively implementing its social and environmental responsibilities."

Giving Back to Society

- © Enhancing Employee Value
- © Bringing Modern Finance into Communities
- © Being Committed to the Public Welfare

Enhancing Employee Value

The Bank views its employees as its most valuable asset, and always follows the "people-oriented" management philosophy. The Company safeguards and improves employee benefits through corporate systems and rules as well as concrete measures while continuing to improve the incentive and restrictive mechanism to effectively push ahead its recruitment and appointment of employees. The Company has continued to expand career paths for its employees and vigorously build excellent corporate culture, enabling both employee growth and business growth.

Improving the Human Resources System

For employee selection and appointment, the Bank follows the principle of "openness, fairness and justness" while "focusing on both moral integrity and professional competence, with the priority given to moral integrity" in hiring, which is also aligned with market-oriented modern enterprise operations. The Company takes professional ethics and moral character as important criteria for employee selection and appointment. The Company brought in 3,346, 2,925, and 4,200 talents in 2008-2010, respectively.

In the area of employee performance review and incentives, the Bank has been committed to achieving the organic unity in strengthening the sustainable development of the Company and the career development of its employees, thereby achieving shared growth of business and individual employees. The Bank implements a dual-track system in employee promotion, in a bid to broaden the space for employee career development and promotion channels while promoting diversified career development planning and self-worth realization. The Bank implements a salary adjustment system aligned to annual performance review, linking employee performance with fixed remuneration adjustments, thereby motivating employees to improve working practices as well as work efficiency and quality in a sustained manner.

On Oct. 10, 2010, the first representative meeting of members of Labor Union Committee and employees of Industrial Bank was successfully held in Fuzhou. Mr. Gao Jianping, Chairman of the Bank (third from the right), Mr. Li Renjie, President of the Bank (second from the right), and Ms. Bi Zhonghua, Chairwoman of the Board of Supervisors (second from the right), attended this meeting.

Safeguarding the Interests of Employees

The Bank strictly complies with relevant provisions of national laws and regulations concerning staff recruitment, contract management, remuneration, etc., in a bid to safeguard employee benefits.

- Signing rate of employee labor contracts, employee social security coverage, mutual housing fund coverage, and rate of distribution in overtime allowance have all reached 100%;
- Resolutely put an end to child labor and oppose any form of forced labor and discrimination, effectively protect employees' holiday rights, and strive to provide a safe working environment for employees;
- Safeguard interests of female employees, stick to equal pay for women, and ensure equal opportunities for men and women in career development;
- Give full consideration to the vital interests of employees and corporate demand for human resources, and develop a pay and benefits system with certain competitiveness and in line with standards for financial enterprises, aligning employees' long-term personal development goals with the Company's long-term goals;
- Further improve employees' comprehensive welfare and security by implementing annuity and supplementary medical insurance schemes; Pay attention to employee health and safety by having staff health checks on a regular basis and actively organizing employees to participate in various forms of cultural and sports activities;
- Promote scientific lifestyle and carry out health lectures including stress and emotional management training sessions, as well as mental health counseling activities.

Enhancing Staff Competence

Given the complex and volatile macro-economic and financial situation, the Bank has come up with the training strategy of "stepping up efforts to enhance internal strength" in a timely manner, which is aligned to the main theme of "continuing to push ahead business restructuring". Targeting different characteristics of senior and middle management executives, marketing and sales teams, professional and technical personnel, and skilled operational teams, the Company has carried out multi-layer, differentiated, and targeted training programs that fully factor in personalized and differentiated needs arising from employee performance reporting and career development, in an effort to enhance employees' professional competence with value creation at the core. Meanwhile, the Company has stepped up efforts to tap its resources to expand training channels in a sustained fashion in areas of institutional mechanisms, hardware facilities, and technical support and increase investment in employee development, while guiding employees to establish the sense of social responsibility, i.e., safeguarding the public interests, ecological environment, and social progress in business activities. In 2010, the head office organized more than 180 training sessions of various types, covering nearly 11,700 trainees.

To carry out the work guideline of "strengthening the implementation and promoting the new development", Shijiazhuang Branch organized the managers above the middle management level to attend the "implementation camp" to get trained in the form of schoolteaching and group race to promote their capacity.

In June 2010, the Discipline Committee at Shijiazhuang Branch organized all employees to visit Shijiazhuang Northern Suburb Prison, as part of its awareness campaign against economic crimes. As bankers face a large amount of cash every day, they should always remain sober minded, practice strict self-discipline, firmly adhere to ideals and beliefs, and build right outlook on life and values.

Creating Employment Opportunities

As of the end of 2010, the Bank had 19,508 full-time employees, including 9,535 male employees and 9,973 female employees. In addition, the Company also signed up 9,706 workers from labor dispatchers. In total, the Company created 29,214 jobs, making due contribution to easing the employment pressure for fresh graduates, lowering the unemployment rate, and maintaining social harmony.

Building Corporate Culture

The Company attaches importance to intra-company teamwork and harmonious corporate culture, always giving full play to the role of collaborations among its branches. To organically combine corporate culture and social responsibility with sustainable development, the Company has united its employees cohesively by organizing a series of colorful and fruitful educational activities, thereby maximally mobilizing the enthusiasm and creativity of its staff, while stepping up efforts to build corporate culture, thus promoting the development of its various undertakings.

The Banking Department of Hefei Branch was awarded as a "2009 Youth Civilized Unit" by the Communist Youth League Anhui Provincial Committee.

To celebrate its 12th anniversary, enrich employees' life and enhance team cohesion and capacity, Shenzhen Branch successfully held its outreach event with the theme of "Anniversary Celebration, Team Building, and Business Execution Capacity Building". At this event, its employees fully demonstrated their solidarity, courage, hard working, positive attitude, as well as high fighting spirit.

The CPC Committee at Nanning Branch invited all party members at the Branch to participate in the "Red Tour in Guilin Xingan", strengthening their understanding of party culture and history, raising their loyalty to the party and patriotism, as well as sense of responsibility and mission.

To commemorate the 89th anniversary of the founding of the CPC, Shenzhen Branch carried out training sessions on patriotism, revolutionary traditions, and superiority of the CPC, in a bid to inspire the enthusiasm and dedication of party members in daily work. The Branch organized its red tour event for party members -- "Review Red Rock spirits and promote business execution and development".

On February 3, 2010, Changsha Branch held its Spring Festival Party 2010 at Hunan International Convention & Exhibition Center. Employees at the Branch choreographed

Nanning Branch has proactively organized a series of activities to strengthen its corporate culture, including the "IB Cup" friendship soccer match, thus contributing to its great corporate culture.

Bringing Modern Finance into Communities

Promoting Financial Literacy

To further popularize financial knowledge and enhance public awareness of financial security, the Bank has actively responded to the event "Banking Public Education Service Day 2010" launched by the CBRC by delivering information to public in a "face-to-face" fashion. Specifically, by carrying out lectures, distributing promotional handouts, playing promotional videos, organizing quiz and other forms of events, the Bank enabled local residents to have a better understanding of finance and enhance their knowledge in wealth protection.

The Shenzhen Branch conducted talks on financial knowledge on banks' public education day.

On June 19, 2010, Nanning Branch organized the event "IB, My Career - Financial Literacy Outreach". By distributing promotional brochures for financial products and carrying out on-site QA sessions, the Branch publicized knowledge about anti-counterfeit money, investment, and wealth management. In line with the specific needs of local residents, its employees also developed tailor-made money management solutions for local community residents for free, helping them establish a right view of investment and financial management.

On November 20, 2010, the Bank actively participated in a large outdoor publicity campaign with the theme of "Building a safe environment for card usage, supporting leapfrog development in the economic zone on the west coast of Taiwan Strait" organized by Fuzhou Central Branch, People's Bank of China. The Company carefully explained knowledge concerning the safe use of bank cards and the prevention of financial fraud to its audience, and handed out manuals on safe use of wealth management cards, further improving local people's financial literature regarding the safe use of cards and effectively enhancing public awareness and prevention of risks associated with card usage.

Shanghai Branch employees visited key residential communities in Shanghai, carrying out its publicity campaign on "3 measures and 1 guideline". Specifically, our employees explained the provisions of relevant laws and regulations to local residents, in an effort to strengthen their legal awareness of loan process management, monitoring of loan usage, and loan risk prevention. The event covered more than 200 residential communities.

Supporting Local Education

In 2010, the Bank continued to work with Fujian Provincial Care for Next Generation Committee to jointly establish the 5-year "Industrial Bank Scholarship for Care of the Next Generation". Under the program, annual donation of RMB180,000 will be awarded to a total of 180 excellent students who are financially challenged in three schools from 2010 to 2014, involving a total of RMB900,000 in five years. Meanwhile, the Bank has, for the fourth consecutive year, worked with the Fujian Provincial Charity Federation to offer "Industrial Bank Charity Scholarship" to 500 students in five schools in Fujian Province, involving a total donation of RMB2 million.

In 2010, the Bank continued to honor its commitments to charity and public welfare through implementation of its "China Heart Credit Card Public Welfare Initiative". The Bank donated RMB54,897.71 in the year on top of RMB186,000 in 2009, bringing the total to RMB240,981.65 in recent years. The Bank provided financial aid for the construction of playground in 6 financially challenged primary schools in Guangxi Province and Hebei Province, helping the schools improve sports infrastructure. The Bank's Credit Card Center sent representatives to launch the "Caring Tour to Baise Old Revolutionary Base" event in Guangxi Baise Weiguo Primary School, checking out the progress in the construction of the playground funded by the Bank in September 2010. Meanwhile, the center also donated a total of more than 5,000 sets of stationery supplies (28 boxes) for the local primary school.

学生体育传奇故事（学生本人填写，800-1500字，可另附纸张）：

我叫黄天龙，男，壮族，是天生桥镇委果村小学五年级学生。我是班里的体育委员。我从小喜欢体育运动，尤其是篮球。每当我见到老师带着篮球在操场上运用自如的时候，我的心、乃至整个人都随着老师的身影运动。我对体育有独特兴趣，我的体育成绩每学期都优秀，在班上起到表率作用。每次学校举行篮球赛，拔河赛，我都会组织本班同学参加，而且全力以赴。今年，我还参加了本校篮球队，参加我镇举行的全镇“六一”篮球比赛。我们学校也取得了优异的成绩。课余时间，我也非常喜欢体育运动，双休日去散步，与伙伴们一起比赛跑步等。同学们都非常佩服我。在我家旁边的空地里，我还建了简易篮球场。

“2008，我的最大梦想”（学生本人填写，一句话）：

“同一个世界，同一个梦想”。我的梦想是，2008北京奥运会能去现场观看篮球比赛。

Changsha Branch carried out its Summer Internship Program 2010. Through the recruitment and selection process, a total of 57 students from key colleges in South and Central China, including Hunan University and Wuhan University, participated in the program. Changsha Branch organized the interns into batches and sent them to its outlets for internship practice. The Branch also designated mentors for the interns and implemented internship performance review mechanism. The Branch stepped up efforts in management throughout the program and carried out postinternship management and assessment. After the program, the Branch offered objective assessment for the interns. The program effectively helped enhance interns' understanding of the Banking industry and improved their overall competence, paving a good foundation for their future career.

Nanping Branch provided funds for the establishment of Heping Town Industrial Bank Kindergarten in Shaowu city, paving the way for the gradual revamp and replacement of a poorly equipped smaller kindergarten. The move has well served the village kids and will greatly improve preschool education level in the ancient town.

In May 2010, Nanping Branch won the "Love Award" granted by Nanping Hope Project.

Nantong Branch called for people from all sectors of the community to make donations for the establishment the "Industrial Bank Education Fund", which is designed to help financially challenged students in Nantong Shipping College and Nantong Yanheqiao Primary School successfully complete their studies by creating a good learning environment for them.

In September 2010, Zhengzhou Branch and Dahe Newspaper Publishing House cosponsored a charity event, raising donations to a local school. The event helped raise cash and goods worth a total of more than RMB370,000 for Yugong Hope Primary School in Jiuyan City. Zhengzhou Branch was also been named as an honorary entity caring for students.

Chongqing Branch donated **RMB250,000** to Chengkou, one of the poorest counties in China, for the purpose of building a Hope Primary School. The Branch also donated a total of **RMB110,000** to the Aid Project for Orphans and the Disabled Children and Aid Project for Left-behind Children of Migrant Workers of Chongqing Youth Development Foundation. Furthermore, the Branch has also established the "Industrial Bank Scholarship" with **RMB300,000** at No.3 Military Medical University, in an effort to support financially challenged students.

Focusing on Local Social Development

In accordance with the spirits of the Circular on Organizing Some Departments Directly under Provincial Government, Key Enterprises and Public Institutions under the Leadership of Provincial Government, and the Central Government's Offices in Jiangxi to Carry out Poverty Reduction in Targeted Areas During the 11th Five-Year Plan Period, it was confirmed that Nanchang Branch would carry out poverty reduction efforts in Lutian Village, Zhangshan Town, Jizhou District, Ji'an City during the 11th Five-Year Plan period.

- To help strengthen the development of grassroots organizations on village level, Nanchang Branch has assisted the village to establish various systems, raising **RMB30,000** funds for improving village government offices and equipping them with relevant office equipment;
- Nanchang Branch has helped raise **RMB160,000** in aid funds for Lutian Village, help paving village roads, fundamentally solving the traveling problem for the village;
- To effectively utilize the industry-based approach to poverty reduction, the Bank raised **RMB50,000** for the village to establish its pine seed association in line with local reality, involving **300** farming households. As a result, per capita income of the farmers quadrupled from 2006. The Bank also helped organize targeted training sessions on labor transfer and practical technical skills;
- In an effort to help create a harmonious and safe village, Nanchang Branch raised **RMB20,000** to address the funding for part of the village's comprehensive administrative work and bought books related to the comprehensive administrative work for village officials;
- Employees of Nanchang Branch visited the village's Luxi Primary School, donating books, school bags, stationery, and other supplies to the school;
- Solid and effective implementation of the "1+1" aid work. Nanchang Branch has the tradition of sending representatives to visit poor households of the village and offer financial aid during both New Year holiday and Spring Festival holiday.

On August 16, 2010, as part of joint working with Inner Mongolia Public Security Border Defense Corps, Hohhot Branch donated RMB200,000 to help establish a grassland border security fund, addressing financial concerns of border officers.

On September 16, 2010, Hohhot Branch donated RMB50,000 to help plant Xingye Wood at the cross of Shengli Road in collaboration with Xingcheng District People's Government, reversing bad road conditions with a touch of vibrant green. Over the next 5 years, Hohhot Branch is expected to further invest RMB250,000 for the expansion and maintenance of the wood.

In 2010, Xi'an Branch organized almost 40 employees as representatives to visit the Return Research Institute's Children Village, a Shaanxi Province-based public welfare charity, which is committed to helping take care and bring up criminals' minor children without custodians. Supplies worth a total of RMB110,000 were donated to the charity. In extending their care, participating employees became deeply aware of how valuable family harmony and harmonious teams could be.

On December 23, 2010, Changde Branch held its opening ceremony based on the principle of thrift and simplicity and donated budget savings of RMB200,000 to Changde Education Bureau and Changde Civil Affairs Bureau, in an effort to support local education and initiatives to help handicapped people.

On February 9, 2010, Hohhot Branch held a low-key opening ceremony and donated budget savings to remote pastoral areas, addressing power supply needs of local nomads. At the opening ceremony, Hohhot Branch donated RMB200,000 to poverty-stricken nomads in Xilin Gol League Zhengnan Banner, bringing the total donations to RMB500,000 in three years.

On April 19, 2010, Changchun Branch held a simplistic opening ceremony and donated budget balance of RMB200,000 to help poverty-stricken workers in Changchun City.

On April 16, 2010, Jining Branch, at its opening ceremony, donated RMB100,000 to Jining School for the Blind.

Being Committed to the Public Welfare

As a corporate citizen, the Bank has actively taken on CSR and obligations by participating in various social welfare activities, thus enhancing its public image and corporate competitiveness. In 2010, the Bank donated a total of RMB64 million in charitable activities.

Caring for Disaster-hit Areas

Helping those in need is a traditional Chinese virtue, as the saying goes, "When difficulties arise in one place, aid comes from everywhere." As the wealth of enterprises comes from the society, giving back to society in an appropriate manner is a social responsibility that enterprises should take on. In 2010, the Bank actively participated in social charity through a variety of ways, including raising funds to aid disaster-hit areas, donations, and charity, paying back to the society with practical actions while fulfilling the obligations as a corporate citizen.

On April 14, 2010, Yushu County, Yushu Tibetan Autonomous Prefecture, Qinghai Province, was hit by an earthquake. Employees of Industrial Bank were very concerned with the disaster's impact on local people. The Bank actively responded to the call of the CPC Central Committee by donating RMB15 million at a fundraising

event jointly organized by the Central Propaganda Department, the Ministry of Civil Affairs, the State Administration of Radio, Film, and Television, and the Red Cross Society of China and sponsored by the China Central Television. The donation amount was the highest among commercial banks participating in the event. Meanwhile, the Bank also launched an initiative calling for its employees to "Donate one day salary" to help people affected by the disaster tide over the difficulty and rebuild their homes as soon as possible. As of April 26, donations from the head office reached **RMB576,568.2** and donations from branches reached **RMB4,779,369.34**, totaling **RMB5,355,937.54**. Meanwhile, the Bank also launched financial services as part of its support to emergency relief efforts, quickly opening up a green channel for disaster relief donations. Customers could make their donations to the Ministry of Civil Affairs, Red Cross Society of China, Chinese Red Cross Foundation, and China Charity Federation through our online banking and mobile banking services, with related wire transfer fees exempt.

In June 2010, Fujian province, where the Bank's head office is located, was hard hit by ultra heavy rainfalls. The Bank immediately mobilized its staff to carry forward the spirits of "When difficulties arise in one place, aid comes from everywhere". A total of **RMB1 million** including employee contribution was donated to the affected areas through Fujian Provincial Charity Federation.

On July 16, 2010, South Shaanxi was hit by the largest flood in a century. Furthermore, the flood also triggered secondary disasters including flush floods, landslides, and mudslides, resulting in huge losses of life and property. In an effort to support local disaster relief efforts and help local people tide over difficult times, Xi'an Branch donated **RMB500,000** to the disaster-hit areas.

On August 8, 2010, Zhouqu County of Gansu Province was hit by ultra large flush floods and landslides triggered by strong torrential rains, which led to serious casualties and economic loss. In an effort to help local people restore production activities and rebuild home, employees of Industrial Bank donated cash and household supplies.

In early 2010, China's southwest region was hit by severe drought rarely seen in history, which greatly affected local production and people's living. Nanning Branch and Ningbo Branch actively organized and mobilized its employees, who are members of the Communist Youth League, to join the fight against drought and disaster relief efforts. Donations were made to residents in the disaster-hit areas as the Bank's efforts in helping local people. 10 employees at Nanning Branch also made field visits to villages hard-hit by the disaster and built reservoirs with local residents affected by the drought.

On August 20, 2010, Nantong Branch under Nanjing Branch cosponsored a charity auction fund-raising event "Wings of Dream - Industrial Bank Soiree" at Nantong Emma Sports Exhibition Center with Nantong City Chongchuan District Youth League and Nantong Shipping College, paying homage to Nantong native Zhao Xiaoting (a college sophomore who lost life in landslides when delivering educational aid services in Yunnan Province). The charity auction helped raise a total donation of RMB19,305, which was delivered to Zhao's poverty-stricken parents.

Actively Organizing of Volunteer Activities

On March 13, 2010, Jinan Branch participated in the "Match Paradise" tree planting event initiated by Lushi Media, claiming the donation of more than 1,000 tree seedlings. In addition to the funds for the purchase of seedlings, the Bank offered the remaining funds to the charity fund named "Match Paradise" initiated by Jinan-based Vision Weekly and Shandong Radio & TV Guide, which is committed to helping mentally retarded, orphans, handicapped children, and vulnerable groups in Jinan City.

In June 2010, as a gesture of good wishes to students sitting the college entrance exams and a tradition of respecting teachers, the Communist Youth League at the Bank's head office and Fuzhou No.1 Middle School's Communist Youth League jointly set up a "service station", offering free beverages as well as pens, shade curtains, and heatstroke drugs to students, parents, and teachers.

In April 2010, volunteers from the Communist Youth League at Hefei Branch actively participated in a social welfare initiative. They visited Hefei Martyrs Cemetery and Shushan Forest Park to pick up litters, in a bid to protect environment there. They also distributed mineral water bottles for free to other visitors having mountaineering activities, which had good social repercussions.

Expand Channels for Interbank Communication and Enhance Global Consensus on Sustainable Finance

February 1, 2010

Mr. Li Renjie, the President of the Bank was invited to have exchanges with Ms. Karin Finkelston, Director, EAP of IFC, on topics including enhancing banks' innovation capacity in developing sustainable financial products and cooperation on financing for Equator Principles Financial Institution projects;

April 2010

The Bank's executives shared experience in implementing the Equator Principles with visiting CITIC Bank executives;

June 2, 2010

Mr. Kang Yukun, Vice President of the Bank, was invited to have exchanges with Mr. Paul Smith, Group Chief Risk Officer of Standard Bank of South Africa concerning the development of environmental and social risk management systems for banks and reached consensus on the adoption of the Equator Principles in emerging market countries;

Early June 2010

Mr. Hua Bing, General Manager for Legal and Compliance Department, was invited to participate in annual meetings on the Equator Principles held in the U.S. and the annual workshop conference organized by the IFC;

July 21, 2010

The Bank was invited to join a conference call with the Sustainable Development Office of Mizuho Corporate Bank in Japan, discussing the promotion of the Equator Principles in China;

October 26, 2010

Mr. Hua Bing, General Manager for Legal and Compliance Department, was invited to participate in the "Interbank Platform Cooperation Forum and Strategy Seminar on Sustainable Development of Chinese Commercial Banks 2010". Mr. Hua gave a presentation on the Bank's philosophy and practice concerning sustainable finance, emphasizing that the Equator Principles and green finance are the best path for the sustainable development of the Banking sector;

November 2010

Mr. Tang Bin, the Bank's Director and Board Secretary (second from the right), was invited to participate in "Global Sustainable Leaders Forum 2010" and delivered a keynote speech on Industrial Bank's practices in seeking sustainable finance.

Actively Involving in Sustainable Financial Development in the World

It is our consistent goal to support sustainable development of our clients, take the initiative to promote the concept of sustainable finance to more stakeholders, and improve and enhance social and environmental benefits by giving full play to the advantage of financial leverage.

Enhancing Information Exchanges with NGOs through Dialogue

2010

The Bank continued its dialogue with non-governmental organizations including the World Wildlife Fund (WWF), Banktrack, Friends of the Earth, and Green Watershed;

May 14-28, 2010

The Bank was invited to send representatives to participate in WWF's African study tours, learning about the environmental and social risk management systems of relevant countries and advanced international experience in review and approval of project environmental and social risk assessment;

2010

The Bank continued to focus on assessment and reporting concerning Industrial Bank by non-governmental organizations (NGOs). For instance, the Bank was invited to provide analysis and feedback to Banktrack's assessment report -- Narrow the gap, as well as relevant information resources; The Bank was also invited to offer information communication and feedback to Green Watershed's Environment Records of Chinese Banking Sector 2010; The Bank also continued to pay attention to the Friends of the Earth's Brief on China's Sustainable Finance.

Participating in the Development of International Standards and Voice the Propositions of China's banking Sector

2010

The Bank actively participated in the review and revision of the Equator Principles Performance Standards and guidance instructions, and was invited to offer revision suggestions on the Performance Standards and guidance instructions;

November 2010

Mr. Hua Bing, General Manager for Legal and Compliance Department, was elected to the GRI Stakeholders Committee, and he has started to perform his duties as a committee member since January 1, 2011, and has been actively involved in the revisions of the G3 framework;

December 1-2, 2010

The Bank was invited to participate in the Equator Principles Strategy Seminar held by Equator Principles Steering Committee, discussing strategies for the development of the Equator Principles over the next five years. The Bank offered comments and suggestions in line with China's unique national conditions.

Promoting the Concept of Sustainable Development and Green Living through Media Platforms

April 17, 2010

Mr. Tang Bin, the Bank's Director and Board Secretary, was invited to participate in the "10th Anniversary of Finance and Financial Management MBA Tsinghua University - Chinese University of Hong Kong" series of events. He delivered a keynote speech named "Turn the green into gold: promote sustainable development through financial innovations - Industrial Bank's Case";

2010

The Bank introduced the philosophy about "Equator Principles" and "Green Finance" in its ad aired by China Central Television, thereby widely raising public awareness;

June 3, 2010

The Bank was invited to attend the "Green Competitiveness Marketing Seminar" sponsored by Sohu's green channel;

August 2010

The Bank was invited to accept Fujian TV's interview, introducing the Bank's efforts in the field of green finance and promote lowcarbon life philosophy among the public;

December 3, 2010

The Bank won the Twenty-first Century Media's "Best Chinese Corporate Citizen Award" for the fourth consecutive time.

of the Equator Principles

Industrial Bank's Implementation of the Equator Principles

Improving the Equator Principles Management System

The Content and Significance of the Equator Principles

As a set of internationally advanced tools and industry benchmarks for environmental and social risk management concerning project financing, the Equator Principles were launched in 2003 and named in line with the goal of "Coordinating interests between North and South and balancing global interests". So far, a total of 70 leading financial institutions on five continents have adopted and implemented the Equator Principles. The Equator Principles emphasize the management of project financings in different categories in line with potential environmental and social risks and impact. Meanwhile, environmental and social risk review at different levels will be carried out for different projects in line with the varying degrees of risks. On this basis, borrowers will be required to develop an Action Plan against the risks and include it into the loan contract. In addition, the Equator Principles also stresses that a lender should implement continued monitoring over project construction and operations after extending a loan and disclose the Bank's implementation of the Equator Principles regularly.

The Bank believes that the sustainable development is a comprehensive concept covering economy, society, culture, technologies, and natural environment, with its implementation requiring concerted efforts of multiple parties including the government, enterprises, social organizations, and the public. Only by involving more stakeholders and advance the tools for sustainable development with more practical methodologies could the Equator Principles gain wider recognition. The Equator Principles are widely used due to the sound environmental and social risk management system as well as an in-depth focus and full-range involvement in the clients' environmental and social performance.

The significance of the Equator Principles for various stakeholders :

Borrower	Economy and Society	Environment and Community	Financial Institutions
Assist in improving the environmental and social performance management system.	Set global benchmarks for environmental and social risk management of financing projects.	Protect the natural environment.	Enhance professional innovation capacity and risk prevention, thus achieving sustainable development.
Enhance the degree of recognition from international organizations.	Reduce and mitigate environmental and social risks for underlying projects.	Improve community ecological and cultural environment.	Promote the practice of social responsibility and enhance brand value.
Reduce policy and operational risks.	Facilitate more efficient allocation of financial resources.	Improve working conditions.	Push ahead business restructuring and changes in profit model.
Enhance the comprehensive competitiveness of companies and promote sustainable development.	Promotion economic restructuring and changes in economic growth mode.	Promote community economic growth.	Integration into the international financial markets.

The Bank's development milestones concerning the Equator Principles

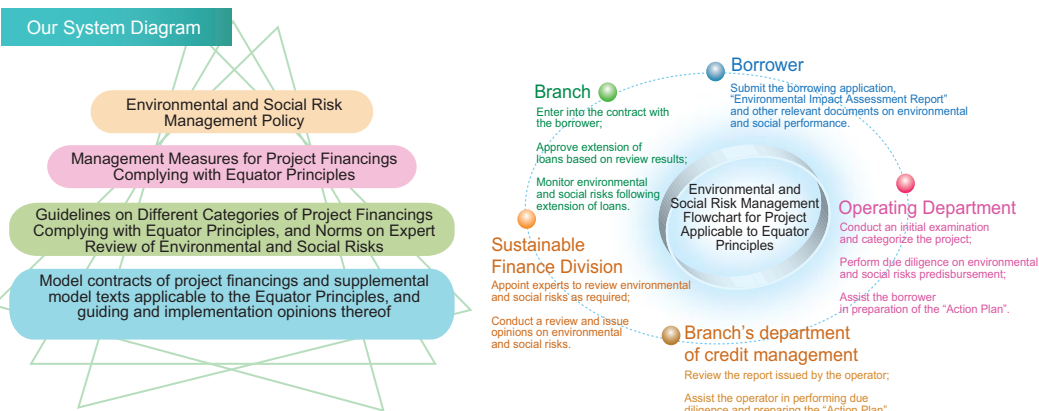

Direction set by decision-makers	On June 28, 2008, the Board of Directors unanimously approved the Bank's Proposal on Applying for Participation in the Equator Principles.
Implementation of the senior management	On July 17, 2008, the Bank established its Equator Principles work leading group headed by Mr. Gao Jianping, Chairman of the Bank, with members including President Li Renjie, Vice Presidents Kang Yukun, Chen Dekang, and Lin Zhangyi, as well as Mr. Tang Bin, the Bank's Director and Board Secretary. Furthermore, the Company also set an additional sustainable finance office under its Legal and Compliance Department.
Involved in exploration efforts for a path towards sustainable development of the Banking industry	During September 17-19, 2008, the Bank assisted CBRC to organize the training sessions on credit extension to energy conservation and emission reduction projects.
Announcement of its official adoption	On October 31, 2008, the Bank held a press conference in Beijing, officially committing itself to the adoption of the Equator Principles in public and becoming China's first "Equator Principles Financial Institution".
Recognition on national level	In December 2008, at the 5th China-U.S. Strategic Economic Dialogue, both sides expressed welcome to the Bank's adoption of the Equator Principles.
Participation by the entire management of the Bank	During December 18-19, 2008, the Bank held its first "Equator Principles Seminar" for the entire management, discussing the Equator Principles and its implementation work at the Bank.
Knowledge dissemination across the Bank	In May 2009, the Bank published the manual Interpretation of the Equator Principles, in an effort to promote knowledge about the Equator Principles across the Bank and improve the Bank staff's awareness of the Equator Principles.
System development	In 2009, the Bank published a series of management systems for project financing in compliance with the Equator Principles, initially completing the building of its Equator Principles system.
A PR window building	In July 2009, the "sustainable finance" column was included into the Bank's website, as a window for the Bank to promote sustainable finance externally.
Spreading the Equator Principles to emerging markets	On August 14, 2009, the Bank held exchanges on the practice of Equator Principles with the visiting Vietnamese green credit delegation.
Comprehensive dialogue with NGOs	In December 2009, the Bank was invited to participate in the Workshop on NGOs' Participation in Promoting Green Credit. At the event, the Bank had exchanges with 34 foreign and domestic NGOs.
First project launched	On December 22, 2009, the Bank held a ceremony and news conference for the first project complying with the Equator Principles in the Chinese banking sector in Yong'an City, Fujian Province, announcing the official launch of the project that complied with the Equator Principles.
Optimization of the system	In the second half of 2010, the Bank carried out assessment over the implementation results of the Equator Principles system and optimized adjustments.
Review	At the end of 2010, the Bank carried out "Branch Review Survey Marking the First Anniversary of the Implementation of the Equator Principles" among selected key branches that have implemented the Equator Principles, fully assessing the implementation of the Equator Principles.
Electronic Process Development	In January 2011, the Bank completed the development and launch of the electronic process -- "environmental and social risk management module", effectively enhancing its environmental and social risk management and efficiency.

The Bank's Management Mode and System for the Equator Principles

The Bank's Organizational Framework for the Work Concerning the Equator Principles

To enhance the efficiency and professionalism of sustainable financial work, the Bank has set up a special division to strengthen the organizational planning, coordination and facilitation, as well as operations for sustainable finance. In July 2008, the Bank established a leadership group consisting of directors of the board and executives, which has been fully in charge of strategic and overall planning for the Bank's development of sustainable finance, thus strengthening the organizational coordination and facilitation of sustainable finance in a top-down approach. The Bank also established a sustainable finance office as the office of the leader group, which has been in charge of the overall implementation of the Equator Principles. Meanwhile, the Bank designed an independent 2-level review and approval system for environmental and social risk management, which consists of "functional departments for sustainable finance at branches - the sustainable finance office at head office". Under the system, the Bank set up functional departments for sustainable finance at branches, which are in charge of environmental and social risk management work including the Equator Principles on branch level.

The Bank's Environmental and Social Risk Management System for Projects Complying with the Equator Principles

Footprints Concerning the Equator Principles in 2010

2010 marked the second year for the Bank to implement the Equator Principles. The Bank's priority is to fully draw on earlier trial experience and organized continued process improvements in line with the implementation results by branches and the head office, thus improving efficiency in a sustained fashion, while further pushing ahead the implementation of the Equator Principles. The Bank also focuses on effectively managing and controlling environmental and social risks for project financing and gradually refines and expands the concept and practice of sustainable finance based on such efforts.

To this end, under the leadership of the Board of Directors and senior management, the Bank has carried out rebuilding efforts targeting organization, processes and capabilities while turning the concept of the Equator Principles into practices. By integrating the scientific and practical aspects of its environmental and social risk management system, as well as management areas, processes and cycles into the Bank's operations and products, the Bank has enriched and beefed up its green finance brand while effectively managing risks. In addition, the Bank has also further explored its green business model and comprehensive rebuilding of its business processes.

Continue to strengthen guidance on the management level, improve efficiency in implementation of the Equator Principles

Step up in-house training and hands-on training projects at various branches ; Facilitate common understanding; Basically complete the building of organizational structure and system.

Focus on information gathering and communication between branches and the head office; Carry out various forms of field research over priorities and challenges in the implementation of the Equator Principles.

Continue to carry out reviews of environmental and social risks for project financings complying with the Equator Principles and bolster the sustainable development of financial services at branches.

Explore the best localized practices for projects complying with the Equator Principles

Prepare project cases and tutorials for training sessions, which will help further enhance operational performance at all levels at the Bank.

Take project review as an opportunity to co-ordinate resources at both local branches and the head office, enhance guidance for projects at branches, strengthen the interactive working mode between local branches and the head office, including provision of comprehensive advisory services for the Bank's branches, development of tracking service plans for project identified as complying with the Equator Principles, and especially the field research and hands-on training (By sending staff from both the head office and branches to the site of specific projects). Meanwhile, based on field research for projects, gradually increase client awareness and acceptance of the Equator Principles and sustainable finance on three levels covering the head office, local branches, and bank outlets. In the picture, Mr. Hua Bing, General Manager of the Legal and Compliance Department (front row, second from the left), leads the team to the site of the project for field research.

Electronic management of workflow

Develop and build "environmental and social risk management module", thus enhancing the level and efficiency in environmental and social risk management.

Implement measures including regularly publishing work briefs, updating and maintaining the "sustainable finance" page on the official website, and compiling the Sustainable Development Report, thus fully enhancing the comprehensive capacity building in internal environment and social risk management in a top-down manner.

Strengthen environmental and social risk monitoring in post-loan management and timely implement precautionary warning.

Strengthen the publicity of the concept and further enhance awareness of environmental and social risk management

Promoting the Equator Principles Projects

Data of the Bank's Equator Principles-applicable Projects

As of December 31, 2010, the Bank reviewed 577 loans (with RMB600 billion in total amount) using the Equator Principles. Among them, 75 loans (with RMB99.365 billion in total amount) were deemed to be applicable, covering 74 customers. 20 of the 75 loans were already issued by 13 of its branches. The detailed project status info is listed in the table below:

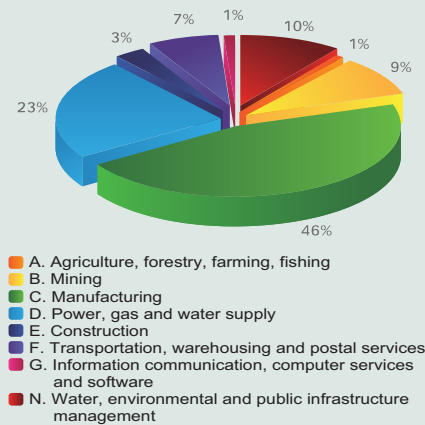

The status of the Equator Principles-applicable Projects by the Industrial Bank (as of December 31, 2010)

Stages	Preliminary review stage	Due diligence stage	Project review stage	Loans issued	Total
#of projects	16	35	4	20	75
Total loans (Unit: RMB100million)	384.41	313.48	54.94	240.82	993.65

Table of the Equator Principles-applicable projects already funded by Industrial Bank (as of December 31, 2010)

Industry distribution of the Equator Principles-applicable projects by Industrial Bank (as of December 31, 2010)

Regional distribution of the Equator Principles-applicable projects by Industrial Bank (as of December 31, 2010)

(Northern China: Beijing, Tianjin, Shanxi; Northeastern China: Liaoning, Heilongjiang, Dalian; Eastern China: Shanghai, Jiangsu, Zhejiang, Anhui, Fujian, Jiangxi, Shandong, Ningbo, Xiamen and Qingdao; Central and Southern China: Henan, Hubei, Hunan, Guangdong, Guangxi, Shenzhen; Southwestern China: Chongqing, Sichuan, Yunnan; Northwestern China: Shaanxi and Xinjiang)

Equator Principles-applicable Case Studies :

Win-win between banks and enterprises with high interest alignment – Shanxi Qiangwei Paper Co. 's new factory with 300K-tonne annual plasterboard surface paper capacity (Phase I)

Basic project information

Shanxi Qiangwei Paper Co. Ltd. ("Qiangwei Paper")'s plasterboard surface paper project is located at the Shouyang Industrial Park in Shanxi Province. Occupying 210km² of land, the project was to build two plasterboard surface paper production lines with complementary wastewater treatment facility, boiler rooms, raw materials and finished goods warehouses as well as office, residence and other facilities. As a large-scale paper production project in Shanxi Province, the total investment was over RMB800 million, over RMB70 million of which was earmarked for environmental protection equipment.

The project implemented strict measures for water conservation and pollution control, by purchasing advanced equipment and technologies as well as integrating with the surrounding infrastructure. Such efforts not only helped improve the client's competitiveness and sustainability, but also drove the economic growth of the surrounding regions, thereby exerting strong positive economic and social impacts.

The Bank's due diligence process to evaluate the project's environmental and social risks using the Equator Principles :

Project sales stage:

The Bank chose environmentally friendly projects and companies to focus its sales efforts. Qiangwei Paper thoroughly considered clean production and energy recycling during the design stage and has invested considerable human and financial resources in environmental protection.

Preliminary review stage:

The Bank classified projects by the extent of their environmental and social impacts (using criteria such as environmental and social sensitivity of the related industry and region, project KPIs, possible environmental and social risks, e.g. environmental and social management systems, labor and working conditions, pollution prevention and control, community health and safety, etc.). This project was classified as a B category project.

Due diligence stage:

The Bank hired a third-party evaluation entity to carry out the project's environmental and social due diligence work before the loans were issued. The Bank also helped the Company design an implementable and measurable "Action Plan", including 20 measures such as setting up a social and environmental management system, preparing a "job-related disease control evaluation report", formulating environmental, health and safety management manuals for accident pool management, chemical product storage and community health and safety impacts, etc.

Environmental and social risk evaluation stage:

The Bank found environmental and social risks such as issues with the job-related disease evaluation process, radioactive equipment registration, accident pool capacity, outsourcing partner management and community communications. Solutions were then worked out accordingly.

Contract signing stage:

The Bank included the "Action Plan" and the related environmental and social risk management requirements in the contract and asked the Company to complete the actions within the deadline.

Post-issuance monitoring stage:

The Bank carries out the quarterly review of the implementation efficiency of the "Action Plan" and major environmental and social risks.

Environmental improvement

Plasterboard surface paper is made using imported (from the US) and domestic waste paper;
The waste water generated from the manufacturing process is treated and then used in urban cleaning and watering applications;
The methane generated from the waste water treatment process is used for power generation using the factory's own power generators;
The heat used in the paper dehydrating process is the extra heat generated by the power generators;
Desulfurated plaster, the byproduct from power generators' flue gas desulfuration process, is sold to the upstream plasterboard makers as raw materials;
By using the world-leading technologies and equipments, standard coal consumption is reduced by 134.4k tonnes annually, CO₂ emission is reduced by 330k tonnes annually, waste paper utilization is 370k tonnes annually, and the waste rock utilization is 272k tonnes annually.

Company management improvement

Setup the environmental and social risk evaluation and management system;
Optimized the job-related safety and pollution prevention mechanisms;
Improved the balance with community interests and built a healthy communication mechanism with the communities.

Social benefits

Support level of surrounding communities reached 92.6%;
Hired a number of local residents to solve their livelihood and employment problems.

Project achievement- interests of banks and companies were highly aligned

- Same philosophy: companies with sustainable future have to pay attention to environmental protection and their social responsibilities.
- Aligned targets: the Equator Principles are banks' key considerations for companies' long-term future.
- Rich help: gradually improved the project's environmental and social issues according to the "Action Plan" to help the client and the project to achieve sustainable development.
- Win-win: as company management improves and stable long-term development is secured, bank's risks are also lowered – a "win-win" for both parties.

"As a paper manufacturer with special focus on pollution emissions, we share the sustainable development principles with the Industrial Bank – the Equator Principles are for companies' long-term development and are important tools for banks and companies to achieve win-win."

"Industrial Banks' environmental and social risk due diligence was an eye opener for us – we will strictly follow the 'Action Plan' to gradually resolve our environmental and social issues and to achieve sustainable development for our company and the project."

——Mr. Jia Ziyun, Chairman of Shanxi Qiangwei Paper Co. Ltd.

"Special understanding" with the consortium loan – Anhui Ruizhan (Tongling) Technology Co. Ltd. 's engine factory with 100k units annual capacity

Basic project information

Anhui Ruizhan (Tongling) Technology Co. Ltd. 's engine factory with 100k units annual capacity ("Ruizhan project") focuses on auto engine cylinder blocks and heads deep-processing, using imported Euro-IV compatible technologies and equipment. The project was to build machinery processing facilities, assembly and testing facilities as well as other supporting functions. The project is largely consistent with Tongling City's auto industry development plan and its overall plan for economic/social development and industry structure transitioning towards a resource-conserving city. Leveraging its parent's strong capital capacity, the client imported key intellectual properties and manufacturing technologies from the world's leading auto makers. Taking advantage of Tongling City's industrial resources, rich natural and labor resources, as well as other complementary capabilities, the client (with relatively small investment) can utilize a large amount of existing assets to transform the old industrial base into new industrialized value chain and thereby upgrading Tongling City's industry structure and increasing its industry diversity to help the city become a energy-conserving city through scientific and quantum development.

Ruizhan project's challenges: as one of the banks in the consortium, how to ensure that the client follows the Equator Principles ?

- ❑ Condition: project owners had deep understanding of sustainable development.
- ❑ Direction: pushed banks and companies to achieve agreement regarding Equator Principles' content and ideas, by improving support capabilities and solution quality.
- ❑ Key focus: introduced third-party experts to help the client design an implementable and measureable "Action Plan", and guided the client to timely and proactively understand the issues and ensure professional operations.
- ❑ Positive results: as one of the banks in the consortium, the Bank got the client's understanding and support, and the client was fully cooperative during the third-party due diligence process.

"The Equator Principles are an important tool for banks to promote the sustainable finance concept and also an opportunity for companies to achieve professional management."

——Mr. Zheng Li, CFO of Ruizhan

Understanding the Equator Principles' deeper value - Jiexiu City Yuye Coal Preparation Co. Ltd. 's coal preparation factory with 3m tonnes annual capacity

Basic project information

Jiexiu City Yuye Coal Preparation Co.'s 3 million tonnes/year factory ("Yuye Coal Preparation project") is located in Jiexiu City in Jinzhong City of Shanxi province. The project mainly included main product facility, raw coal storage, waste rock storage, intermediary coal storage, silt coal storage, cleaned coal storage and other complementary facilities. According to Jiexiu City's plan, the location is the industrial park tailored for coal carbonization and coal chemical industries.

Fully understood third-party's environmental and social risk due diligence report and dug deep the value of the Equator Principles

Banks :

- Through third-party professional consulting companies, the Bank fully searched and analyzed the related project's environmental and social track record, making up the missed or omitted info during its previous in-house evaluation due to its lack of professionalism in this area.
- Optimized its project approval and monitoring process by providing key focus targets.

Customers :

- Increased its ability to recognize environmental and social risks: third-party reports identified risks and provided solutions in areas such as regulatory approval, construction safety, employee rights and land usage, etc.
- Through the introduction of the international standards in the Equator Principles, an objective environmental and social KPI was established and companies could compare themselves with global standards to easily find gaps.
- Provided a complete "Action Plan" as the guidance for companies' environmental and social KPI management.

"As the first Equator Principles-applicable project in Shanxi, we changed from complete unacceptance to full support through a management philosophy upgrade and transition. A series of diligence and evaluation, such as energy conservation, environmental protection and employee cares, were an inspection and optimization process for our internal management, helping us better pursue sustainable development. We will continue to work with Industrial Bank to pursue a win-win based on the principles of people-orientation and harmonious development. "

——Mr. Zhao Haibing, Chairman of the Jiexiu City Coal Preparation Co.

Improved Capabilities Based on the Equator Principles

According to Equator Principles Financial Institutions' experience and practice, the resources lacking the most during the adoption process are the experts with strong capabilities in environmental and social risk management. As a result, building internal capabilities has always been the foundation for the Bank to build sustainable finance. In 2010, through comprehensive development in mechanisms, channels and content, its internal capabilities have achieved substantial improvement.

Setup Training System

By December 31, 2010, the Bank had carried out nearly 100 training sessions on the Equator Principles. The training covered a wide range of topics, from management concept to execution capabilities, from system optimization at the HQs level to process optimization at the branch level, from case studies for key branches to concept introduction for new branches and institutions (e.g. Industrial Bank Financial Leasing Co.,Ltd.), from theoretical training to on-site learning, and from publishing the "Equator Principles Update" to constant updating of the "Sustainable Finance" channel on the Bank's website. According to different demands from the head office and branches, the Bank has established multi-tiered and multi-channel training system for concept education and capability building. A training system that fits its sustainable development goals has been developed to improve its environmental and social risk management capabilities. In the picture, Mr. Hua Bing, General Manager of the Legal and Compliance Department, is conducting special training on the Equator Principles to the Industrial Bank Financial Leasing Co.

In 2010, the number of page view on the "Sustainability" section on the Bank's website has reached 200,000 more than each month. At the end of 2010, the page view has been over 1 million times. The "Sustainability" section has become one of sections on this website with the highest page view.

Various training sessions for the Bank (as of December 31, 2010)

Entity	Training methods	# of sessions	# of people trained
HQs	Internal training(for the head office)	5	85
	Internal training (for branches)	10	709
	On-site training	10	212
	Online training	Posted online 6 applicable projects' materials.	
Branches	Internal training	36	6,695
	Internal exam	2	677
	On-site visits	19	1,047
	Online training	Jinan Branch organized the materials (basic knowledge, systems and processes) and uploaded on its training website for all employees to access.	

Emphasized Information Communication between HQs and Branches

On-site Face-to-face Surveys with Branches

At the end of 2010, as a key component of its "strengthening execution capabilities and promoting new development" initiative, the Bank chose a number of key branches to carry out the "Anniversary review of the implementation of the Equator Principles". The survey, led by Mr. Kang Yukun (second from the left), Vice President of the Bank, was aimed to understand the implementation status at branches as well as the issues and difficulties encountered so as to lay the foundation for further expansion and HQs-branch interactions. In addition, the survey was also designed to help achieve consensus with project owners regarding the concept of Equator Principles and sustainable development.

Strengthened Business Guidance and Communication While Inspecting Projects

Leveraging the full-cycle management advantage of the Equator Principles, HQs' sustainable finance office started to engage from the preliminary evaluation stage via consulting and guidance. Specific experts were assigned to follow up the projects throughout the identification, classification and evaluation process – a HQs-branch interactive working model has been established. During the environmental and social risk due diligence stage, the experts were dispatched to conduct on-site inspection and training. Through these experts, complete communication was facilitated among the three levels within the bank (HQs, provincial branches and local branches) and the project owners. Through the information communication mechanism, local branches' operational capabilities were enhanced and the bank's overall Equator Principles system structure and execution capabilities were improved.

Consolidating Bank-wide Information Semi-annually

To comprehensively monitor the implementation of the Equator Principles, the Bank consolidated related information bank-wide on a semi-annual basis, with main focus on related organizational structure, people allocation situations, internal processes, main issues and solutions, internal training as well as customer communications and feedback.

External Comments

- ❑ "Industrial Bank's disclosure of the Equator Principles transactions is far better than other banks', and this is the transparency that all compliant banks should follow and many NGOs would like to see." (Abstract from Friends of Earth (FOE) 's " Sustainable Finance in China" Newsletter # 7, Feb 2010)
- ❑ "Leveraging the reputation as the first Equator Principles-compliant bank in China and its optimizing product portfolio, the Industrial Bank may become the green finance leader in the low-carbon era." (Abstract from Energy magazine's "Make Banks Greener" by Wang Rui, No. 6 in 2010)
- ❑ "As the first Chinese bank to be compliant with the 'Equator Principles', the Industrial Bank has pioneered the green finance innovation in the Chinese banking industry in recent years and become an icon as the 'green finance herald'." (Abstract from Southern Metropolis Daily's comments on the "Southern Metropolis low-carbon people of the year" campaign; September 9, 2010)
- ❑ "From specific projects' perspectives, the Equator Principles may bring some short-term pressure on Industrial Bank's profitability. But in the long run, the Equator Principles have indeed become a competitive advantage for the bank." (Abstract from China Economic Times' "Severe shortage in policy support to encourage green loans" by Guo Jinhui, December 16, 2010)
- ❑ "China's implementation of green credit policies has emerged in 3 levels (i.e. 3 tiers). The first tier banks, such as the Industrial Bank, have joined the "Equator Principles" organization..." (Abstract from China Environment Daily's "How can green credit become dark green? " by Ban Jian, December 27, 2010)

Appendix

Key Events of Industrial Bank's Sustainable Development (2010)

- In January 2010, the first industry-specific e-commerce platform – Industrial energy trading center (<http://www.fjxycoal.com/>) went online. The industry e-commerce platform is the e-banking service we introduced to meet enterprise customers' demand for online trading and the exchange center's demand for capital monitoring.
- In January 2010 Beijing, together with China Beijing Environment Exchange, the Bank introduced the first low-carbon theme credit card in China – China low-carbon credit card. This was a new step for the Chinese banking industry to deal with global climate change and implement strategies for energy conservation and emission reduction. This was also a concrete step for Chinese consumers to experience low-carbon lifestyle – indicating that the high-end credit card users in China are starting to embrace green consumption and low-carbon lifestyle.
- In February 2010, the award ceremony of the 6th "China Baosteel Environmental Prize" was held at the Great Hall of the People in Beijing. The Bank, with the outstanding efforts in the sustainable finance and green loans areas, was awarded the "China Baosteel Environmental Outstanding Award", becoming the first financial institution to win this award.
- In February 2010 Fuzhou, the Bank signed strategic partnership agreement with Fujian SME Credit Re-guarantee Co. Ltd. According to the agreement, the Bank would provide the SME Credit Re-guarantee Co. up to RMB2 billion revolving credits and start a comprehensive partnership with Fujian SME Credit Re-guarantee Company to help SMEs secure financing. The two parties would jointly explore new SME financing guarantee models to resolve the bottleneck and manage credit risks – helping SMEs in the West Bank of the Strait region achieve rapid and healthy growth.
- In February 2010, Mr. Li Renjie, President of the Bank was invited to have exchanges with Ms. Karin Finkelston, Director, EAP of IFC, on topics including enhancing banks' innovation capacity in developing sustainable financial products and cooperation on financing for Equator Principles Financial Institution projects.
- In February 2010, Mr. Hua Bing, General Manager of the Bank's Legal and Compliance Department, was invited to deliver the key note speech to introduce the Bank's experience regarding Equator Principles at the "Risk Management and Commercial Innovation to Pursue Sustainable Development for the Banking Industry" seminar, co-hosted by CBRC and IFC.
- In March 2010, the Bank first introduced the client side service for the agent payment system in China, providing strong support for numerous town and village banks to break the payment settlement bottleneck to offer complete financial services. The expansion of this service will help expand financial service networks in the rural areas and accelerate product and service innovations for the rural market, thereby laying the solid foundation to continuously increase rural residents' income.
- In March 2010, Mr. Hua Bing, General Manager of the Bank's Legal and Compliance Department, was invited to the

opening ceremony of the "2010 China Business News – Love of Green" event and the "China Business News Summit Roundtable", both organized by China Business News. He also did a special interview with China Business News.

- At 8:30pm on March 27, 2010, the Bank's HQs, over 500 branches and over 20,000 employees nationwide participated in the "Earth Hour" environmental protection event. Lights in all buildings, offices and billboards at all locations were turned off simultaneously. This simple and direct action highlighted its commitment to energy conservation/emission reduction and low-carbon lifestyle.
- In March 2010, the Bank was invited to participate in Party School of the CPC Central Committee Strategy Research Institute's survey regarding "low-carbon finance and China's strategic transition study".
- In March 2010, to implement government policies to support SMEs and private economies, the Bank introduced "Xing Ye Tong", the first comprehensive financial solution in China tailor-designed for self-employed business owners, proprietary businesses, partnership companies and other private "growing enterprises". The solution covered a comprehensive set of financial solutions for growth companies, including loans, payment settlement, personal asset management and VIP services, to help growth companies setup a scientific financial plan to achieve growth in both wealth and quality of life.
- On 17 Apr 2010, Mr. Tang Bin, the Bank's Director and Board Secretary, was invited to deliver the keynote speech "Turning green into gold: promoting sustainable development through financial innovation – Industrial Bank's case studies" at the "10th Anniversary of the Tsinghua University – the Chinese University of Hong Kong finance MBA program" event.
- In Apr 2010, the Bank signed strategic partnership agreement with the Taiwan Investment and Business Association ("Taiwan Association") in Fujian province. This was the first of its kind between a national commercial bank and a provincial Taiwan Association, and it was another major measure to provide financial support to the "two advanced areas" in the West Bank of the Strait region.
- In May 2010, Mr. Tang Bin, the Bank's Director and Board Secretary, was invited to deliver a keynote speech on the Bank's practices in the Equator Principles and social responsibilities areas at the "Capital Market Innovation Forum" event organized by the Shanghai Securities Exchanges.
- In May 2010, one year after the State Council issued the "Opinions on supporting Fujian province to accelerate the development of the West Bank of the Strait economic zone", the Bank hosted a news conference in Fuzhou and announced the "Opinions on further integrating with and servicing the development of the West Bank of the Strait", which included the "RMB100 billion Plan" and "6 major projects", to position itself as a key force to fully integrate with and service the quantum-leap development of the West Bank of the Strait region.
- In May 2010, the Bank hosted the contract-signing ceremony in Yantai for the comprehensive strategic partnership agreement with the Evergrowing Bank (including the branch interchange and VIP portal cooperation agreements).
- In May 2010, Mr. Hua Bing, General Manager of the Bank's Legal and Compliance Department, was invited to attend CBRC Fujian branch's interactive regulation forum in Nanning. He shared the Bank's experiences in the Equator Principles and sustainable finance areas with CBRC representatives from all over China.
- In May 2010, the Bank was invited to send representatives to participate in WWF's African study tours, learning about the environmental and social risk management systems of relevant countries and advanced international experience in review and approval of project environmental and social risk assessment.
- In June 2010, the Bank announced the result of the stock follow-on offerings – the offerings were 99.25% subscribed, which was the highest ratio in the A-share market since 2008. The offerings were a major success.
- In June 2010, the Bank launched the "Open Sesame" plan to help SMEs grow and pursue stock market listing. The plan provides an integrated "one-stop-shop" solution with comprehensive, diversified, convenient and secure services to help SMEs grow.
- In June 2010, Mr. Kang Yukun, Vice President of the Bank, was invited to have exchanges with Mr. Paul Smith, Group Chief Risk Officer of Standard Bank of South Africa concerning the development of environmental and social risk management systems for banks and reached consensus on the adoption of the Equator Principles in emerging market countries.

- In June 2010, Mr. Hua Bing, General Manager of the Bank's Legal and Compliance Department, was invited to attend the annual Equator Principles conference and the annual learning conferences held by IFC in the US.
- In July 2010, Hang Seng Indexes Company Limited. announced "Hang Seng Corporate Sustainability Index Series". Through its consistent efforts and outstanding performance, the Bank was included in two indexes – the "Hang Seng (China A) Corporate Sustainability Index" and the "Hang Seng (Mainland and Hk) Corporate Sustainability Index". In the "Hang Seng (China A) Corporate Sustainability Index", its weighting was the second largest at 10.32%.
- In August 2010, Mr. Tang Bin, the Bank's Director and Board Secretary, was invited to attend the "2010 China Banker Forum – Banking Industry Transitions in Post-Financial Crisis Era and 2010 China Commercial Bank Competitiveness Report Announcement" event hosted by the "Bankers" magazine. He delivered the keynote speech titled "Green concept and banks' business model innovations".
- In August 2010, the Bank held the bank-wide legal and compliance training classes in Xi'an. Its Vice President Mr. Kang Yukun gave an important speech, and an in-depth discussion was carried out among colleagues from the HQs and branches regarding hot topics in the compliance and sustainable development areas.
- In September 2010, the "Directors & Boards" magazine published an article titled "Sustainable finance: Industrial Bank's commercial logics", detailing the magazine's interviews with our Chairman, Mr. Gao Jianping, and other key management team members. The article also introduced our innovations in the sustainable finance concept and business models.
- In September 2010, Mr. Li Renjie, President of the Bank, was invited to attend the Global Finance Summit during the 6th Northeast Asia Expo, and he gave a keynote speech on the Bank's experience in implementing the Equator Principles and developing green finance.
- In September 2010, Mr. Li Renjie, President of the Bank, gave a speech at the First Global Low-carbon Finance Summit Forum and accepted the special interview by the 21st Century Business Herald newspaper. During the interview, he introduced the Bank's experience and practices in the green finance and low-carbon finance areas.
- In September 9-10 2010, the Bank was invited to attend the training workshop on sustainable banking jointly organized by the Policy Research Center for Environment and Economy, Ministry of Environmental Protection and Sichuan Banking Regulatory Commission, and share our experience.
- In September 2010, the Bank won the "Best Social Responsibility Award in the Banking and Insurance Industry" co-sponsored by Rankins CSR Ratings, Hexun and DNV. The Bank was also invited to share its practical experiences in implementing the Equator Principles at the roundtable discussions.
- In October 2010, the Bank organized the "2010 Interbank Platform Cooperation Forum and the Strategy Seminar for Sustainable Development of Chinese Commercial Banks". Surrounding the theme of commercial banks' sustainable development, the event allowed participants to share their experiments and experiences in building sustainable finance as well as to analyze the environment and trend of the commercial banking industry in the post-financial crisis era so as to promote the sustainable development of China's banking industry.
- In November 2010, the Bank held the contract-signing ceremony for the strategic partnership agreement with China Unicom in Fuzhou. Mr. Li Renjie, President of the Bank, Mr. Chen Dekang and Mr. Lin Zhangyi, Vice Presidents of the Bank, as well as China Unicom's COO Mr. Lu Yimin and EVP Mr. Jiang Zhengxin attended the ceremony. This event indicated that the two sides' partnership entered a brand new phase.
- In November 2010, Mr. Tang Bin, the Bank's Director and Board Secretary, was invited to attend the "Global Sustainable Development Leaders Summit 2010" and gave a keynote speech on the Bank's experiences in practicing sustainable finance.
- Mr. Hua Bing, General Manager of the Bank's Legal and Compliance Department, was elected as a member of GRI' related party committee. He is the committee's only member from Asian financial institutions. He was also invited to come to Beijing in November 2010 to attend the first China GRI conference.
- In November 2010, Mr. Hua Bing, General Manager of the Bank's Legal and Compliance Department, was invited to attend the "China-Overseas Green Loans Experience Exchange Conference" held by CBRC, and he introduced the Bank's practices and experiments in the sustainable finance area.

- In December 2010, the Bank was invited to attend the series of meetings of the "Equator Principles' 5-year Strategic Planning Forum" held by the Equator Principles Association in Beijing.
- In November-December 2010, the Bank chose a number of key branches to carry out the "Anniversary review of the implementation of the Equator Principles" and comprehensively reviewed the status of the Bank's implementation work.
- In December 2010, the Bank signed partnership agreement with Fujian Province' Science and Technology Bureau in Fuzhou to jointly develop financial technologies and their industrialization platform to promote financial innovations and integration with technology innovations so as to support SMEs' growth in Fujian Province. According to the agreement, the Bank would use a number of comprehensive financial solutions (e.g. aggregate financing and credits, "Xing Ye Open Sesame" program, etc.) to provide priority support to science parks, technology companies and projects recommended by the Science and Technology Bureau. Through its efforts, the Bank aim to actively promote the commercialization of scientific research results and patents to promote the sustainable growth of the high-tech industry.
